

## Delta Electricity

Delta Electricity is a long time supporter of students studying at the University of Newcastle's Central Coast Campus. Delta Electricity funds a total of four scholarships, demonstrating its commitment to supporting higher education. Three scholarships are for undergraduate students and the fourth supports an Indigenous student.

Each of the scholarship offers \$2,500 to a student from the Central Coast or Lake Macquarie region. These scholarships provide students with the extra financial support and boost in confidence they need to complete their degrees to the best of their ability.

Commercial Manager John Koller said Delta Electricity prides itself on being a socially responsible organisation that 'gives back' to the community.

"We are proud to support the University of Newcastle and its students. A scholarship can alleviate some of the financial burden that university courses and text books can be.

"Without that extra bit of pressure students can focus on their studies with a little more peace of mind," Mr Koller said.

Delta Electricity supports many community activities, programs, services and facilities along with the University of Newcastle.

Formed in 1996, Delta Electricity produce electricity from coal, gas, water and biomass, and their generators produce around 12 per cent of the electricity needed by consumers in the National Electricity Market.

### 2011 Delta Electricity Scholarship Winners:

*(L-R) Scholarship winner Sarah Doherty, Shirley Gray from Delta Electricity, scholarship recipient Bonnie Denness and scholarship winner Kurt Dimmock. (Absent Rebecca Gaston)*
