

## How can PAJE be used?

PAJE is a fully searchable journal database for researchers and professionals across all areas of Education. Key information included is:

- ♦ Editorial contact information and addresses
- ♦ The area(s) within Education covered by each journal
- ♦ The types of articles published
- ♦ The refereeing process
- ♦ QScore: a unique journal quality measure based largely on esteem within the profession

The PAJE database can be sorted on criteria to meet group and individual scholar needs, both current and future. There are 26 areas of Education used, and the number of journals in each area ranges between 5 and 80. A first useful sort will often be by discipline area.

Price only

# \$110.00 per copy

Plus \$22.00 postage and packing, when ordered and paid on-line via PayPal. [Australian Tax Invoices will be supplied with the goods].

Price if an institution official order form is used: \$110.00 per copy, plus \$33.00 invoice surcharge [per invoice], plus \$22.00 postage and packing per invoice. [Australian Tax Invoices will be supplied with the goods. Terms net 14 days from invoice date.]

All prices include GST.

The University of Newcastle

# Publishing in Academic Journals in Education

**PAJE** is a new resource for academics and other professionals providing information about 1042 refereed journals with a focus on Education. It will be updated regularly as new journals emerge, others cease publication, and changes are made to information about existing journals.

**PAJE** is a large database in MS Excel © and it is fast and easy to use.

**PAJE** also comes with supporting academic reference information in the form of brief papers on the background to journal quality measures, the components and structure of **PAJE**, and the development of the QScore as a measure of journal quality. For Early Career Researchers, there are also short papers on writing for publication, publishing in electronic journals and the practice of peer review.

**PAJE** has a deliberately international focus, however, 116 of the 1042 journals listed are based in Australia. In the main, **PAJE** is intended for Australian academics and other professionals with an interest in Australian education, so it is important that Australian journals have a prominent place. In contrast to the inclusiveness of **PAJE**, journal assessments made by organisations based overseas typically include very few Australian journals.

Information provided about each journal includes editorial contact information, composition of the editorial board, the area(s) within Education covered, types of articles published, the refereeing process, the length of articles accepted, and journal quality measures.

## What are the uses of PAJE?

In the intensifying climate of research assessment globally, academics need tools that will assist them to most effectively disseminate and capitalise on their research. More specifically for Australian academics, the Excellence in Research for Australia (ERA) research assessment will include an emphasis on the importance of publishing in quality journals.

## TIME SAVING for busy academics!

**PAJE** should be your first port of call to obtain information about what journals exist in your area and where you should submit your manuscript. Once you have narrowed the choice, if you need further information you can then go to those websites journal web addresses are provided in **PAJE**.
