

1. Select the results you want to keep, then click **Export**.

The screenshot shows the EMBASE search results interface. At the top, there is a navigation bar with buttons for 'View', 'Print', 'Export', 'E-mail', 'Order', and 'Add to Clipboard'. The 'Export' button is circled in red. Below the navigation bar, there are sorting options: 'Sort by: Relevance' (selected) and 'Publication Year'. There are also options for 'Selected: 2 (clear)' and 'select first: 100, 500, 5000'. Below the sorting options, there are two search results, each with a checkbox on the left. The first result is checked and circled in red. The second result is also checked. The first result is: '1 An apple a day keeps the doctor away: Children's evaluative categories of food' by Nguyen S.P., *Appetite* 2007 **48:1** (114-118) EMBASE [Full Text from ScienceDirect](#). The second result is: '2 Measuring behavioural susceptibility to obesity: Validation of the child eating behaviour questionnaire' by Carnell S., Wardle J., *Appetite* 2007 **48:1** (104-113) EMBASE [Full Text from ScienceDirect](#).

2. Select the Export Format as EndNote, and click **Export**.

The screenshot shows the 'Export' dialog box. The title bar says 'Export'. Inside the dialog, there is a message: 'To export the 2 selected Documents, choose your preferences and click Export.' Below the message, there is a label 'Export Format:' followed by a dropdown menu showing 'EndNote'. The dropdown menu is circled in red. Below the dropdown menu, there are two buttons: 'Cancel' and 'Export'. The 'Export' button is circled in red.

3. EndNote will open and prompt you to select the EndNote library you wish to import the results into.

Important!
Check the quality of references you have imported, and edit them as necessary.
