

1. Select the results you want to keep.

The screenshot shows the EndNote Results Manager interface. The 'Results' column has 'Selected Results' selected. The 'Fields' column has 'Complete Reference' selected. The 'Result Format' column has 'Direct Export' selected. The 'Actions' column has 'Save' selected. A search result for 'diabetes mellitus' is shown with a checkbox checked.

2. In the Results Manager box:

- Specify which results you want to export, under the column headed **Results**,
- Specify which fields you want to export, under the column headed **Fields**,
- Select **Direct Export** from the **Result Format** column,
- Select **SAVE** from the **Actions** column.

3. EndNote will open and prompt you to select the EndNote library you wish to import the results into.

Important!
Check the quality of references you have imported, and edit them as necessary.
