

Reproductive Science Research

School of Biomedical Science and Pharmacy, UoN

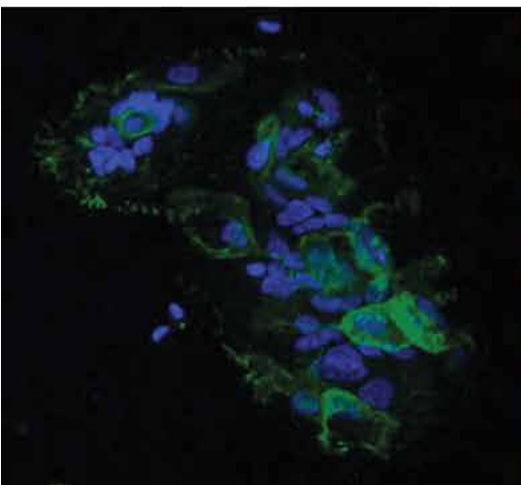

We study pregnancy, reproductive health and fertility!

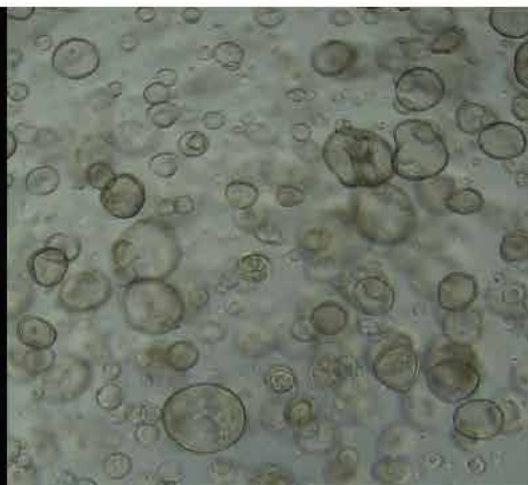

To do this we use a variety of laboratory techniques to address and discover more about pregnancy pathologies and infertility problems.

Our projects use common laboratory techniques like:

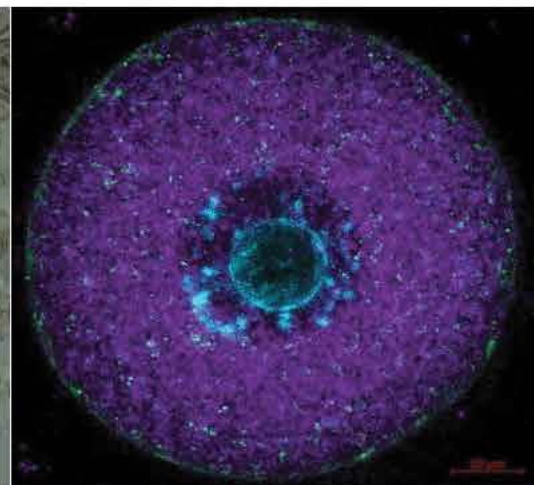

- Gene/protein analysis
- Cell culture & tissue collection
- Microscopy

Protein analysis
Placental cells
(Dr Saije Endacott)

Cell Culture
Endometrial organoids
(Tess Symington)

Protein analysis
Egg/Oocyte
(Lachlan Wild)

Lab team at the Hunter Medical Research Institute

We have research teams based at both the Hunter Medical Research Institute and the University of Newcastle!
