Department of Planning, Housing and Infrastructure

Mr. Bailey Trigg Project Manager The APP Group Level 2, 426 King Street Newcastle NSW 2300

15 August 2025

Subject: University of Newcastle, City Campus Student Accommodation - Staging Report

Dear Mr Trigg,

I refer to the *Staging Report University of Newcastle City Campus Student Accommodation* (Job SN114, Revision D, dated 11 August 2025, prepared by The APP Group) ('the Report'), submitted in accordance with Schedule 2, Condition A20 of the University of Newcastle City Campus Stage 1B, including a nine-storey building (known as Building B) for the purpose of student campus accommodation and ground floor retail Development Consent (SSD-61618229). I also acknowledge your response to the Department's review comments and request for additional information.

The Department has carefully reviewed the Report and is satisfied that it meets the requirements of Condition A20.

Please ensure that:

- any Aboriginal archaeology salvage works are completed prior to construction impacts per the construction programme; and
- the Locomotive Turntable exclusion zone is maintained for the duration of construction, in accordance with Condition C41.

You are reminded that if there are any inconsistencies between the Report and the conditions of consent, the conditions prevail.

Please ensure that you make the Report publicly available on the project website at your earliest convenience.

Yours sincerely,

Michael Pyr

Michael Doyle

A/Team Leader, Regional Assessments

As nominee of the Planning Secretary

11 August 2025

Jane Flanagan Senior Planner Key Sites & Regional Assessments Department of Planning and Environment 4 Parramatta Square 12 Darcy Street PARRAMATTA

Dear Ms Flanagan,

SSD-61618229-PA-5 City Campus Student Accommodation Staging Re: Report

APP have reviewed your Request for Information dated 11th of July 2025 and provide the following response:

RFI - 11/08/2025

Please submit a revised version which corrects the references to the following duplicate figures: two different versions of Figure 5 are on pages 12 and 13; and two different versions of Figure 6 are on pages 11 and 14).

Please also update the date and revision number of the Report, accordingly.

Response - 11/08/2025

Please refer to the attached Revision D of the Staging Report as per your request.

Should further information be required please don't hesitate to contact the undersigned.

Yours sincerely,

Bailey Trigg Project Manager 0435 447 069

2 Objective

This report has been prepared to satisfy SSDA Condition #A20 – Staging Report. The condition reads as follows:

The project may be constructed and operated in stages. Where compliance with conditions is required to be staged due to staged construction or operation, a Staging Report (for either or both construction and operation as the case may be) must be prepared and submitted to the satisfaction of the Planning Secretary. The Staging Report must be submitted to the Planning Secretary no later than one month before the commencement of construction of the first of the proposed stages of construction (or if only staged operation is proposed, one month before the commencement of operation of the first of the proposed stages of operation).

This staging report will outline the following:

- The works to be completed under each stage (or construction certificate),
- Site establishment layout
- Timeframe for each stage / CC,
- · Operational impacts and risk management

3 Introduction

3.1 Project Overview

This project forms part of the overarching University of Newcastle City Campus development, which includes a series of lots situated between Honeysuckle Drive and Civic Lane in Newcastle CBD. The overarching development will be completed over multiple stages and includes the following buildings:

- Stage 1A

o Building A1

- Stage 1B

o Building B

- Stage 2

o Building A2

- Stage 3

o Building C

- Stage 4

o Building D, E & F

This project specifically refers to **Building B**. This stage (Stage 1b), represents the next step in delivering the vision for the University's City Campus, and will build on the University's historical and current presence (University House, Northumberland House, Conservatorium of Music, NUspace and Q Building) in the Newcastle CBD.

Figure 1: University of Newcastle City Campus development overview.

The project works for Building B include:

- Site grading and removal of existing vegetation

- Construction of a nine storey building (building B) to be used for campus student accommodation and retail.
- Maximum gross floor area (GFA) of 10,765m2, comprising of:
 - o Approximately 130m2 of retail floor space at ground level,
 - o Approximately 683m2 of communal residential amenity facilities at ground level, and
 - o Approximately 9,520m2 of student accommodation including a total of 445 beds
- End of trip facilities, including 90 bicycle spaces and back of house amenities; and
- Associated landscaping and public domain work

3.2 Site Plan

The below Figure 2 indicates the general site establishment plan, outlining vehicle access points, site facilities, cranage and traffic control provisions. The site office, amenities and contractor parking area shall remain in the designated area shown below throughout the duration of construction works.

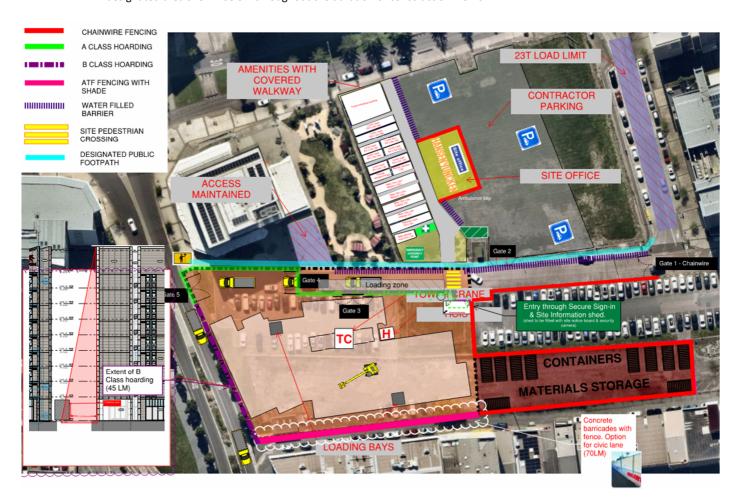

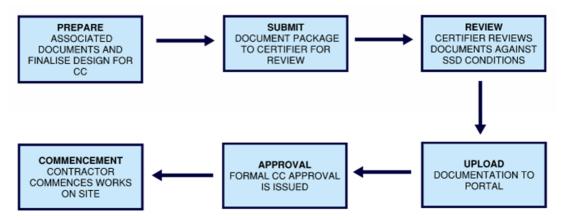

Figure 2: Site Establishment Overview

4 Staged Construction Certificates

CC Overview:

The below Construction Certificate (CC) Staging methodology has been determined following the review of the required design packages and the duration of the associated works packages. This aims to ensure appropriate design work and the required documentation is prepared in advance of submitting and commencing works under a particular CC. The process for each CC is as follows:

4.1 Construction Certificate 1 – Groundworks, In-ground services & Substructure

The specific works included under this CC include:

- Bulk and detailed excavation
- Piling & Footings
- In ground services and authority connections

The documentation for this CC will be prepared by Hansen Yuncken and the consultant design team and subcontractors. CC documentation for this phase will be collated in June 2025, with anticipated approval by July 2025. All works under this CC will be completed from July – October 2025. The timeline for this CC is as follows:

- Late June 2025
 - o CC1 documentation to be finalised for PCA Review
- July 2025
 - Anticipated approval of CC1.
- July 2025 October 2025
 - Duration of all groundworks including bulk earthworks, foundation piles and acid sulphate soil remediation.
- August 2025 September 2025
 - Duration of lift pit structural works, OSD tank, Worth Place services works including footings and waterproofing
- August 2025 October 2025
 - Incoming services works including stormwater reticulation and connection to pits, connection of sewer to existing, electrical services reticulation, installation of new fire hydrants and fire booster and connection to existing network.

Refer to Figure 3a and 3b below for the overview of works under CC1.

Figure 3a: Overview of CC1 works.

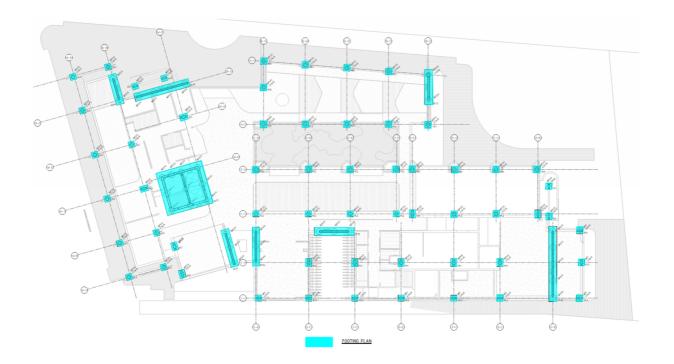

Figure 3b: Footing Plan

4.2 Construction Certificate 2 – Superstructure

The specific works included under this CC include:

• Superstructure from ground level to roof / plant

The documentation for this CC will be prepared by Hansen Yuncken and the consultant design team and subcontractors. CC documentation for this phase will be collated in August 2025, with anticipated approval by late August 2025. All works under this CC will be completed from September – June 2026. The timeline for this CC is as follows:

- Mid August 2025
 - CC2 documentation to be finalised for PCA Review
- Late August 2025
 - Anticipated approval of CC2.
- September 2025 November 2025
 - Commencement of superstructure works to Ground Floor, including detail excavation of pile caps, in ground drainage, precast columns and walls, FRP slab on ground.
- October 2025 June 2026
 - Duration of superstructure works from Level 1 to roof overrun including, FRP slabs, PT duct install, structural steel above L9 plantroom, post tensioning and back propping removal.

Refer to Figure 4a and 4b below for the overview of works under CC2.

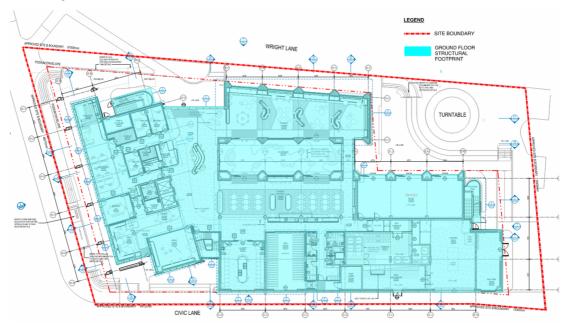

Figure 4a: Ground Plan Structural Overview

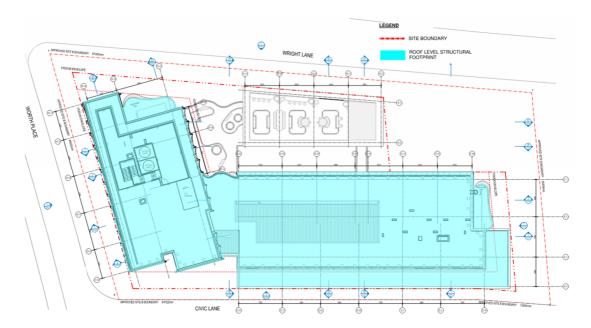

Figure 4b: Roof Plan Structural Overview

4.3 Construction Certificate 3 – Façade

The specific works included under this CC include:

• Façade works (including glazing, curtain wall and cladding)

The documentation for this CC will be prepared by Hansen Yuncken and the consultant design team and subcontractors. CC documentation for this phase will be collated in October 2025, with anticipated approval by late October 2025. All works under this CC will be completed from January 2026 – August 2026. The timeline for this CC is as follows:

- October 2025
 - o CC3 documentation to be finalised for PCA Review
- Late October 2025
 - o Anticipated approval of CC3.
- January 2026 August 2026
 - Duration of external cladding works including installation of curtain wall from ground level to Level 9, façade finishes, façade inspections, external signage and lighting.
- July 2026 August 2026
 - Balcony mesh installation, loading bay façade install, completion of plant room façade to stair O1 walls.

Refer to Figure 5 & 6 below for the overview of works under CC3.

Project name: UNIVERSITY OF NEWCASTLE CITY CAMPUS STUDENT ACCOMMODATION

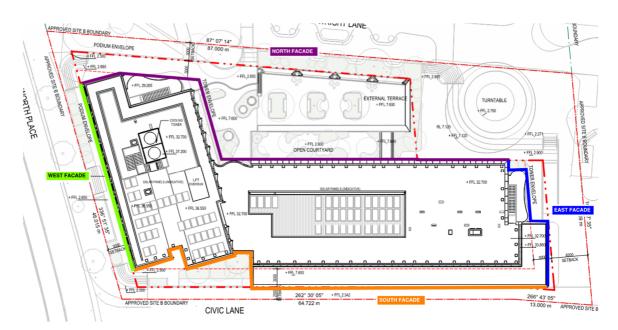

Figure 5: Overview of façade elevations (plan view)

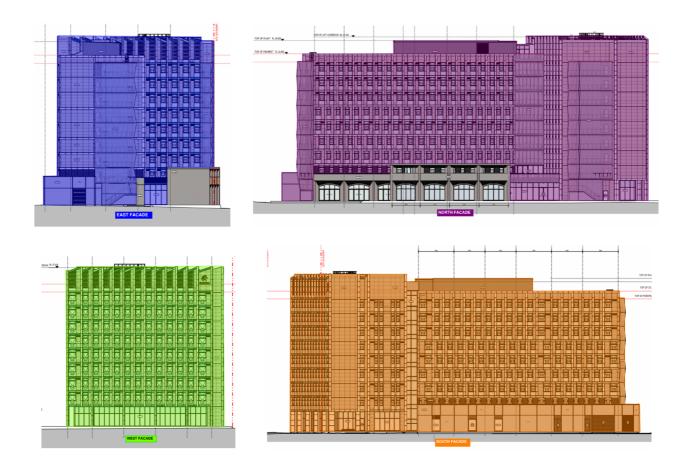

Figure 6: Overview of façade elevations (elevation view)

4.4 Construction Certificate 4 – Services and Finishes / Fitout

The specific works included under this CC include:

- Services works & commissioning
- Internal finishes and fitout

The documentation for this CC will be prepared by Hansen Yuncken and the consultant design team and subcontractors. The timeline for this CC is as follows:

- September 2025
 - o CC4 documentation to be finalised for PCA Review
- Late October 2025
 - o Anticipated approval of CC4.
- January 2026 July 2026
 - Ground floor, services rooms and retail internal works including: bathroom pod installation, high level services rough in, partitions and linings, joinery installation, wet area works, floor and wall finishes and services test and commissioning.
- February 2026 September 2026
 - Level 1 to Roof Plant internal works including: bathroom pod installation, high level services rough in, partitions and linings, joinery installation, wet area works, floor and wall finishes and services test and commissioning.

Refer to Figure 7 below for the overview of works under CC4.

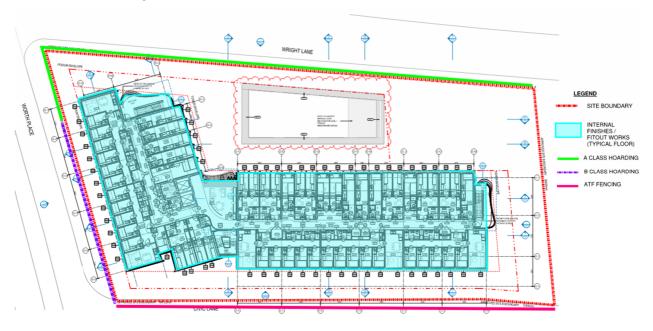

Figure 7: Overview of CC4 works.

4.5 Construction Certificate 5 – Balance of Works

The specific works included under this CC include:

- Landscaping works
- lic domain works

The documentation for this CC will be prepared by Hansen Yuncken and the consultant design team and subcontractors. The timeline for this CC is as follows:

- November 2025
 - o CC5 documentation to be finalised for PCA Review
- Late November 2025
 - Anticipated approval of CC5.
- April 2026 July 2026
 - Level 1 external terrace works including: construct planters and bench seating, drainage waterproof membranes, paving works, soft landscaping and install furniture and miscellaneous items.
- April 2026 October 2026
 - o Building surround works including GF courtyard including: earthworks, soft landscaping works, paving works and installation of furniture and miscellaneous items.
- July 2026 August 2026
 - Public domain works including street landscaping, make good road and footpaths, external lighting and furniture works.

Refer to Figure 8, 9 & 10 below for the overview of works under CC5.

Figure 8: Ground Floor Zone 1 Public Domain and landscaping works

Figure 9: Ground Floor Zone 2 landscaping works.

Figure 10: Level 1 podium landscaping works

Project name: UNIVERSITY OF NEWCASTLE CITY CAMPUS STUDENT ACCOMMODATION

5 Operation

Following completion, the Applicant anticipates a single commencement of operation. As such a staged operation is not required.

Project name: UNIVERSITY OF NEWCASTLE CITY CAMPUS STUDENT ACCOMMODATION

6 Construction Risk Management

The Project proposes a staged Construction Certificate approach in order to de-risk and increase program efficiency. Common risks such as the design not being appropriately progressed, and authority approvals not being received in time for a single construction certificate are removed. The current approach allows flexibility, where an element of the work is not yet adequately designed or approved by an authority it can likely be shifted into a preceding Construction Certificate in order to maintain the program of works.

Project name: UNIVERSITY OF NEWCASTLE CITY CAMPUS STUDENT ACCOMMODATION

7 Conclusion

The University of Newcastle City Campus Student Accommodation Development will be constructed generally in-line with the abovementioned Construction Certificate staged approach over 5 separate CCs. All CCs will be prepared by the Head Contractor, Hansen Yuncken. There will be no staged occupation approach considered as part of the Staging Plan, and the project is expected to be completed and handed over to the Client by late-2026 The proposed stages will allow the works to be delivered in the most timely and efficient manner and minimise its impact on the community and ensure ample time is provided for the finalisation of the design prior to commencing each relevant stage of construction.

	liability of \$20 million. A copy of the Insurance cover is to be provided to Council. CROWN BUILDING WORK Crown building work cannot be commenced unless the relevant Crown Building work is certified by or on behalf of the Crown to comply with the technical provisions of the State's							
B13	building laws in force as at: (a) the date of the invitation for tenders to carry out Crown building work; or (b) in the absence of tenders, the date on which the Crown building work commences.	~	~	~	Ý	~		
B14	PRE-CONSTRUCTION REQUIREMENTS ECOLOGICALLY SUSTAINABLE DEVELOPMENT (ESD) Prior to the commencement of construction, the Applicant must register for a Green Star Buildings v1 rating with the Green Building Council Australia and submit evidence of registration	·						
B15	to the Certifier. EXTERNAL WALLS AND CLADDING The external walls and cladding must comply with the relevant requirements of the NCC.			v				
B16	Prior to the commencement of construction of external walls and cladding, the Applicant must provide the Certifier with documented evidence that the products and systems proposed for use or used in the construction of external walls including finishes and claddings such as synthetic or aluminium composite panels comply with the requirements of the NCC.			v				
	NATIONAL CONSTRUCTION CODE COMPLIANCE The proposed works must comply with the applicable performance requirements of the NCC to achieve and maintain acceptable standards of structural sufficiency, safety (including fire safety), health and amenity for the ongoing benefit of the community. Compliance with the performance requirements can only be achieved by:							
B17	(a) complying with the deemed to satisfy provisions; or (b) formulating an alternative solution which: (i) complies with the performance requirements; or	~	~	√	~	√		
	(ii) is shown to be at least equivalent to the deemed to satisfy provision; or (iii) a combination of (a) and (b). MAXIMUM HEIGHT							
B18	The maximum height of the approved building must not exceed RL 37.53m AHD, including plant and lift overruns, communication devices, antennae, satellite dishes, masts, flagpoles, chimneys, flues and the like. Details confirming compliance must be submitted to the Certifier prior to the commencement of above ground works. COMPLIANCE WITH ACOUSTIC ASSESSMENT		~					
B19	Prior to the commencement of above ground works, the Applicant must submit a Report to the Certifier from an acoustic Engineer demonstrating that the design of the development has incorporated all performance parameters, requirements, engineering assumptions and recommendations contained in the Noise and Vibration Assessment, prepared by ACOR Consultants and dated 17 June 2024.		√					
B20	COMPLIANCE WITH WIND IMPACT ASSESSMENT Prior to the commencement of above ground works, the Applicant must submit a Report to the Certifier demonstrating that the design of the development has incorporated the wind mitigation measures contained within the document titled Pedestrian Wind Environment Assessment, prepared by Windtech Consultants dated 15 July 2024.		·					
	STORMWATER QUALITY ASSESSMENT The development must comply with the Integrated Water Management Report (Flooding and Stormwater) prepared by TTW PTY LTD dated 8 August 2024. Prior to commencement of							
B21	substructure works, a design certification report prepared by a suitably qualified practitioner engineer demonstrating compliance with approved MUSIC link targets and parameters must be submitted to the Certifier. The report must include a response to all stormwater quality improvement devices structural integrity, treatment train and their treatment properties demonstrating compliance with the approved MUSIC link reports.		~					
B22	FLOOD PLANNING LEVELS The development must be constructed to comply with the recommended flood planning levels indicated in the Flood Impact Risk Assessment, Revision 04, prepared by Torrent Consulting dated 03 March 2025.	~	~					
B23	OUTDOOR LIGHTING All outdoor lighting within the site shall comply with, where relevant, AS/NZ1158.3: 1999 Pedestrian Area (Category P) Lighting and AS4282: 1997 Control of the Obtrusive Effects of Outdoor Lighting. Details demonstrating compliance with these requirements are to be submitted to the Certifier prior to the commencement of public domain works.					~		
	Outdoor Lighting. Details demonstrating compliance with these requirements are to be submitted to the Certifier prior to the commencement of public domain works. STRUCTURAL DETAILS Prior to the commencement of substructure works, the Applicant must submit to the Certifier, the relevant structural drawings prepared and signed by a suitably qualified practising							
B24	Structural Engineer that demonstrates compliance with: (a) the relevant clauses of the NCC; and (b) the development consent.	·						
B25	Prior to the commencement of all works not subject to condition B27, the Applicant must submit to the Certifier, the relevant structural drawings prepared and signed by a suitably qualified practising Structural Engineer that demonstrates compliance with: (a) the relevant clauses of the NCC; and		·					
	(b) the development consent. REFLECTIVITY The building materials must have a maximum normal specular reflectivity of visible light of 20 per cent. If the proposed building materials do not comply with the above reflectivity			· ·				
B26	requirement, then an alternate materials / mitigation measures must be proposed so that the facades of the building would not result in glare that causes any discomfort or threatens the safety of pedestrians or drivers. A statement prepared by a suitably qualified expert, demonstrating compliance with the requirements of condition B29 must be submitted to the satisfaction of the Certifier prior to the			· ·				
B27	commencement of the cladding of the external facades. MECHANICAL PLANT NOISE MITIGATION Details of noise mitigation measures for all mechanical plant are to be detailed on the relevant Construction drawings. Certification from an appropriately qualified acoustic engineer that		,	,				
B28	the proposed measures will achieve compliance with the requirements of the NSW Industrial Noise Policy is required to be submitted to the Certifier prior to the commencement of above ground works. MECHANICAL VENTILATION		Ý					
B29	All mechanical ventilation systems shall be installed in accordance with the NCC and shall comply with Australian Standards AS1668.2 and AS3666 - Microbial Control of Air Handling and Water Systems of Building, to ensure adequate levels of health and amenity to the occupants of the building and to ensure environment protection. Details shall be submitted to the Certifier prior to the commencement of above ground works.		~					
B30	The mechanical exhaust system for the ground floor retail tenancy is to be designed to be capable of accommodating exhaust requirements in accordance with relevant Australia Standards, in order to allow for the event that the tenancy is approved for future use as a food premises or other use which requires mechanical exhaust. SANITARY FACILITIES FOR DISABLED PERSONS				· ·			
B31	The Applicant shall ensure that the provision of sanitary facilities for disabled persons complies with Section F2.4 of the NCC. ACCESS FOR PEOPLE WITH DISABILITIES Access and facilities for people with disabilities must be designed in accordance with the NCC. Prior to the commencement of above ground works, the Certifier must ensure that		· ·		v			
B32	evidence of compliance with this condition from an appropriately qualified person is provided and that the requirements are referenced on any certified plans. Applicant must submit to the satisfaction of the Certifier CRIME PREVENTION THROUGH ENVIRONMENTAL DESIGN (CPTED)		Ý					
В33	To minimise the opportunity for crime, the recommendations of the CPTED Report prepared by Ethos Urban dated 22 November 2024 and the revised Preliminary Operational Management Plan prepared by the University of Newcastle, dated 14 March 2025 are to be revised by a suitability qualified expert to incorporate CPTED treatments that specifically respond to the suburb's mid-to high rated crime hotspot offence categories, including stealing from motor vehicles and dwelling, and assaults (non-domestic). Details demonstrating		~					
B34	compliance with the requirements are to be submitted to the Certifier prior to the commencement of above ground works. TACTILE GROUND SURFACE INDICATORS AND HANDRAILS All tactile ground surface indicators, handrails and other elements required to provide access into the building/property must be located entirely within the private property boundary.					·		
B35	COMPLIANCE WITH ACOUSTIC REPORT PORT RELATED – PORT AUTHORITY Prior to the commencement of above ground works, verification shall be provided to the consent authority that the development has been designed and will be constructed to achieve		·					
B36	the Design Noise Levels noted in the EIS and Acoustic Assessment, with regards to including port-related noise. ADAPTABLE UNITS Prior to the commencement of above ground works, the Applicant must submit to the Certifier a Report demonstrating that any adaptable units specified in the approved plans or		·					
	supporting documentation comply with the applicable Australian Standards. MANAGEMENT PLANS CONSTRUCTION ENVIRONMENTAL MANAGEMENT PLAN							
	Prior to the commencement of any works, a Construction Environmental Management Plan (CEMP) shall be submitted to the Certifier. The CEMP must address, but not be limited to, the following matters where relevant: (a) Details of:							
	() hours of work (ii) 24 hour contact details of the site manager (iii) community consultation and complaint handling procedure							
	(iv) traffic management (v) noise and vibration management, prepared by a suitably qualified person (vi) management of dust and odour to protect the amenity of the neighbourhood			.	.	.		
B37	(wii) stormwater control and discharge, including measures to ensure that sediment and other materials are not tracked onto the roadway by vehicles leaving the site (viii) prevention and contamination management, including any unexpected contamination finds protocol (ix) waste management	~	Maintain and update as required	Maintain and update as required	Maintain and update as required	Maintain and update as required		
	(x) external lighting in compliance with applicable Australian Standards (xi) site security, including fencing or hoarding (xii) flora and fauna management.							
	(b) Construction Pedestrian and Traffic Management Sub-Plan in accordance with condition B41; (c) Construction Noise and Vibration Management Sub-Plan in accordance with condition B42; (d) Construction Waste Management Sub-Plan in accordance with condition B43;							
	(e) Construction Soil and Water Management Sub-Plan in accordance with condition B44; (f) an unexpected finds protocol for contanniation and associated communications procedure in accordance with condition B54; (g) an unexpected finds protocol for Aborniginal and non-Aboriginal heritage and associated communications procedure in accordance with conditions B55 and B59; and							
	(h) weste classification (for materials to be removed) and validation (for materials to remain) to be undertaken to confirm the contamination status in these areas of the site CONSTRUCTION PEDESTRIAN AND TRAFFIC MANAGEMENT SUB-PLAN Prior to the commencement of any works, the Applicant must submit to the Certifier a final Construction Pedestrian and Traffic Management Plan Sub-Plan (CPTMP) for the development with measures to reduce environmental impacts and harm during construction of the development arising from construction traffic, including, at a minimum, the following							
B38	development with measures to reduce environmental impacts and narm during construction of the development arising from construction traffic, including, at a minimum, the following information: (a) location of any proposed work zone(s); (b) construction vehicle access arrangements and haulage routes;	_	Maintain and update			Maintain and update		
	(a) construction vehicle access arrangements and naturage routies; (c) predicted number and timing of construction vehicle movements and vehicle types; (d) identification of potential conflicts between vehicle movements required for construction and general traffic, cyclists, pedestrians, bus services within the vicinity of the site from construction vehicles:		as required	as required	as required	as required		
	(e) be prepared in consultation with Council; and (f) Settlement I are must not be used by heavy construction yebicles because of weight load restrictions. CONSTRUCTION NOISE AND VIBRATION MANAGEMENT SUB-PLAN							
	Prior to the commencement of any works, the Applicant must submit to the Certifier a Construction Noise and Vibration Management Sub Plan (CNVMP) for the development, prepared by a suitably qualified person, with measures to minimise environmental impacts and harm during construction of the development arising from construction noise and vibration, including, at a minimum, the following:							
	(a) Identification of noise sources and sensitive receivers. (b) quantification of the rating background noise level (RBL) for sensitive receivers; (c) describe procedures for achieving the noise management levels in EPA's Interim Construction Noise Guideline (DECC, 2009) (ICNG) (as may be updated or replaced from time to							
B39	time) ((d) prediction and assessment of potential noise, ground-borne noise (as relevant) and vibration levels from the proposed construction methods expected at Sensitive Receiver premises against the objectives identified in the ICNG	~	Maintain and update as required	Maintain and update as required	Maintain and update as required	Maintain and update as required		
	(e) noise mitigation measures that can be implemented to reduce construction noise and vibration impacts, including: (i) installation of acoustic barriers/enclosures; and (ii) alternative excavation methods:							
	(f) describe the measures to be implemented to manage high noise generating works such as piling, in close proximity to sensitive receivers; (g) measures to identify non-conformances with the requirements of the CNVMP, and procedures to implement corrective and preventative action and to respond to complaints; (h) procedures for notifying residents of construction activities that are likely to affect their noise and vibration amenity; and							
	(i) include a complaints management system that would be implemented for the duration of the development CONSTRUCTION WASTE MANAGEMENT SUB-PLAN Prior to the commencement of any works, the Applicant must submit to the Certifier a Construction Waste Management Sub Plan (CWMP) for the development. The CWMP must							
	include, as a minimum, the following information: (a) requirement that all waste generated during the project is assessed, classified and managed in accordance with the EPA's "Waste Classification Guidelines Part 1: Classifying Waste"; Waste";							
B40	(b) demonstrate that an appropriate area will be provided for the storage of garbage bins and recycling containers and all waste and recyclable material generated by the works; (c) procedures for minimising the movement of waste material around the site and double handling; (d) requirement that waste (including litter, debris or other matter) is not caused or permitted to enter any waterways;	~	Maintain and update as required	Maintain and update as required	Maintain and update as required	Maintain and update as required		
	(e) requirement that any vehicle used to transport waste or excavation spoil from the site is covered before leaving the premises: (f) requirement that the wheels of any vehicle, trailer or mobilised plant leaving the site are cleaned of debris prior to leaving the premises; and (g) details in relation to the transport of waste material within the site and from the site, including (at a minimum):							
	(i) a traffic plan showing transport routes within the site; (ii) a commitment to retain waste transport details for the life of the project to demonstrate compliance with the Protection of the Environment Operations Act 1997; and (iii) the name and address of each licensed facility that will receive waste from the site							

	s Student Accommodation							
CONDITION	DESCRIPTION	CC1 - Inground Works	CC2 - Superstructure	CC3 - Façade	CC4 - Services and Finishes / Fitout	CC5 - Balance of Works	ОС	Operation
B41	CONSTRUCTION SOIL AND WATER MANAGEMENT PLAN SUB-PLAN Prior to the commencement of any works, the Applicant must submit to the Certifier a Construction Soil and Water Management Sub-Plan (CSWMP) for the development. The CSWMP must be prepared by a suitably qualified expert, in Consultation with Council and include, at a minimum, the following information: (a) describe all erosion and sediment controls to be implemented during construction (b) details of measures to be implemented to ensure that sediment and other materials are not tracked onto the roadway by vehicles leaving the site. (c) provide a plan of how all construction works will be managed in a wet-weather event (i.e. storage of equipment, stabilisation of the site); (d) detail all off-site flows from the site during construction; and (e) describe the measures that must be implemented to manage stormwater and flood flows for small and large sized events, including, but not limited to 1 in 1-year ARI, 1 in 5-year ARI and 1 in 100-year ARI.	,	Maintain and update as required	Maintain and update as required	Maintain and update as required	Maintain and update as required		
B42	FLOOD MANAGEMENT Prior to the commencement of any earthwork or construction, the Applicant must prepare and implement for the duration of the works: (a) flood warning and notification procedures for construction workers on the site; and (b) evacuation and refuge protocols.	~	Maintain and update as required	Maintain and update as required	Maintain and update as required	Maintain and update as required		
B43	GEOTECHNICAL DESIGN, CERTIFICATION AND MONITORING PLAN Prior to the commencement of any works, the applicant must engage a suitably qualified and practicing Engineer having experience in the geotechnical and hydrogeological fields, to design, certify and oversee the construction of all subsurface structures are designed to: (a) Certification that the civil and structural details of all subsurface structures are designed to: (i) provide appropriate support and retention to neighbouring property; (ii) ensure there will be no ground settlement or movement during exexavation or after construction (whether by the act of excavation or dewatering of the excavation) sufficient to cause an adverse impact to adjoining property or public infrastructure; and (iii) ensure that the treatment and drainage of groundwater will be undertaken in a manner which maintains the pre-developed groundwater regime, so as to avoid constant or ongoing seepage to the public drainage network and structural impacts that may arise from alteration of the pre-developed groundwater table. (b) A Geotechnical Monitoring Plan (GMP) to be implemented during construction that: (i) is based on a geotechnical investigation of the site and subsurface conditions, including groundwater; (ii) details the location and type of monitoring systems to be utilised, including those that will detect the deflection of all shoring structures, settlement and excavation induced ground vibrations to the relevant Australian Standard; (iii) details recommended hold points and trigger levels of any monitoring systems, to allow for the inspection and certification of geotechnical and hydro-geological measures by the professional engineer; and (iv) details an action plan and contingency for the principal building contractor in the event these trigger levels are exceeded.	*	Maintain and update as required	Maintain and update as required	Maintain and update as required	Maintain and update as required		
B44	The certification and the GMP is to be submitted to the Certifier prior to the commencement of any works other than any above ground demolition and site clearing works. Copies of the certification and GMP must be provided to the Planning Secretary. PRE-CONSTRUCTION DOCUMENTATION AND MEASURES	~						
B45	PRE-CONSTRUCTION DILAPIDATION REPORT The Applicant is to engage a qualified structural engineer to prepare a Pre-Construction Dilapidation Report detailing the current structural condition of all retained existing and adjoining buildings, infrastructure and roads within the 'zone of influence'. The report shall be submitted to the Certifier prior to any works commencing. A copy of the report must be forwarded to the Council and each of the affected property owners. The Pre-Construction Dilapidation Report shall also include a photographic recording of the public domain site frontages and must be submitted to Council. The recording must include clear images of the footpath, nature strip, kerb and gutter, driveway crossovers and laybacks, kerb ramps, road carriageway, street trees and plantings, parking restriction and traffic signs, and all other existing infrastructure along the street. The form of the recording is to be as follows: (a) a PDF format report containing all images at a scale that clearly demonstrates the existing site conditions; (b) each image is to be labelled to identify the elements depicted, the direction that the image is viewed towards, and include the name of the relevant street frontage; (c) each image is to be numbered and cross referenced to a site location plan; (d) a summary report, prepared by a suitable qualified professional, must be submitted in conjunction with the images detailing the project description, identifying any apparent existing defects, detailing the date and authorship of the photographic record, the method of documentation and limitations of the photographic record; and (e) include written confirmation, issued with the authority of both the Applicant and the photographer that Council is granted a perpetual non-exclusive license to make use of the copyright in all images supplied, including the right to make copies available to third parties as though they were Council images. The signatures of both the applicant and the photographic rouse of the council images	,						
B46	SURVEY CERTIFICATE Prior to the commencement of above ground works, the Applicant must cause the building to be set out by a Registered Surveyor to verify the correct position of all structures in relation to site boundaries and the approved alignment levels, and cause the Registered Surveyor to submit a plan to the Certifier, certifying that structural works are in accordance with this consent		v					
B47	The Applicant must cause a Registered Surveyor to measure and mark: (a) prior to commencement of works - the positions of all footings/ foundations; and (b) at other stages of construction - any marks that are required by the Certifier, and provide information on the positions to the Certifier.	·	~					
B48	HOARDING A separate application under section 138 of the Roads Act 1993 is to be made to the relevant road authority to erect a hoarding and/or scaffolding in a public road and such application is to include: (a) architectural, construction and structural details of the design as well as proposed artwork; and (b) structural certification prepared and signed by an appropriately qualified practising structural engineer. Evidence of the issue of a Structural Works inspection Certificate and structural certification will be required prior to the commencement of construction works on site, only as they relate to the specific works under section 138 of the Roads Acts 1993 required by condition B51.	As required	As required	As required	As required	As required		
B49	BARRICADE PERMIT Where construction/building works require the use of a public place including a road or footpath, approval under section 138 of the Roads Act 1993 for a Barricade Permit must be obtained prior to the commencement of works, only as they relate to the specific works under section 138 of the Roads Act 1993 required by condition B49. Details of the barricade construction, area of enclosure and period of work must be submitted to the satisfaction of the relevant road authority.	As required	As required	As required	As required	As required		
B50	ROAD OCCUPANCY LICENCE A Road Occupancy Licence (ROL) must be obtained from the relevant road authority under section 138 of the Roads Act 1993 for any activity that may impact on the operation of the road network. The ROL allows the Applicant to use a specified road space at approved times, provided certain conditions are met. The Applicant must allow a minimum of 10 working days for processing ROL applications. Traffic Control Plans are to accompany each ROL application(s) for any such activities.	As required	As required	As required	As required	As required		
B51	CONTAMINATION UNEXPECTED FINDS Prior to the commencement of works, an Unexpected Contamination Finds Protocol (UFP) prepared by a suitably qualified and experienced expert shall be prepared. The protocol should include detailed procedures for identifying and dealing with unexpected contamination, asbestos and other unexpected finds. The Applicant should ensure that the procedure includes details of who will be responsible for implementing the unexpected finds procedure and the roles and responsibilities of all parties involved. The UFP must be submitted to the satisfaction of Certifier. The UFP must be implemented for the duration of construction works. Details demonstrating compliance with the above requirements must be submitted to the Certifier. A copy of all the documentation outlined in the above requirements must be submitted to the Planning Secretary.	·						
B52	HISTORICAL ARCHAEOLOGY – HERITAGE NSW A procedure for the management of unexpected relics and human remains must be developed in consultation with Heritage NSW. This procedure must: (a) be prepared in accordance with Heritage NSW guidelines and codes of practice. (b) include a hold point requiring the development of a revised historical archaeological assessment in the event an unexpected relic is identified. (i) The Archaeological Assessment must be prepared in accordance with the guideline Archaeological Assessment (1996) and Assessing Significance for Historical Archaeological Sites and Relics (2009) to inform and guide archaeological mitigation measures. (ii) If harm cannot be avoided in whole or part, an Archaeological Research Design and Excavation Methodology (ARDEM) with a nominated Excavation Director should also be prepared to guide any proposed excavations or salvage program. (iii) The Archaeological Assessment must be provided to the Secretary of the Department of Planning, Housing and Infrastructure for approval in consultation with Heritage NSW. (c) must be implemented for the duration of the project.	·						
B53 B54	All reasonable steps must be taken to avoid harm, modification of or impact to relics except as authorised by this approval. Keep a record of, and ensure all on-site workers receive suitable heritage inductions prior to carrying out any development activities on site. MARITIME UNEXPECTED FINDS – HERITAGE NSW	V	√	✓	✓ ✓	V		
B55	A maritime specific Unexpected Finds Protocol (MUFP) is to be prepared by a suitably qualified and experienced maritime archaeologist as defined in the Australasian Institute for Maritime Archaeology Code of Ethics. The MUFP items must specifically include: (a) briefings of onsite works staff in recognition of maritime heritage items. (b) consideration of short and long term management, conservation, restoration, storage and interpretation of any significant maritime heritage items and how these aspects will be funded.	*						
B56	(a) the possibility for redestant if significant maritime heritage items are discovered during works. ABORIGINAL CULTURAL HERITAGE MANAGEMENT PLAN - ACHIMP Prior to the commencement of works, the Applicant must prepare an ACHIMP for the development. This plan must: (a) be prepared by a suitably qualified and experienced person; (b) be prepared in consultation with the RAPS and reviewed by Heritage NSW (c) include a methodology for a test excavation and salvage exavation program with Aboriginal Stakeholder participation of sites to be impacted with consideration to understanding site characteristics, and local and regional archaeological context (d) include a description of the measures (and associated methodologies) that would be implemented for: (i) salvaging and relocating the Aboriginal heritage items located within the approved development footprint; (ii) include updated baseline mapping of the heritage items within and adjoining to the development disturbance area; (iii) include updated mapping of all areas that have been and will be subject to test excavations, and salvage excavations; (iv) include conservation options for the mitigation and avoidance to impacts AHIMS registered sites situated within and outside the project footprint; (v) include a procedure for assessing significance of Aboriginal Objects identified during the test excavations, and salvage excavation and ensure that the management and mitigation measures are considered for all sites, and with special consideration for those of high significance (vi) the long-term management of any Aboriginal heritage items or material collected during the test excavations or salvage works; (vii) ensuring workers on site receive suitable heritage inductions prior to carrying out any development on site, and that records are kept of these inductions; (viii) onging consultation with RAPs during the implementation of the ACHIMP; (iv) preparing Aboriginal Site Impact Recording Form/s (ASIRFs) for all Aboriginal heritage sites following construction activiti	*						
B57	In include a program to monitor and renort on the effectiveness of these measures and any heritane impacts of the project. Upon the completion of Aboriginal cultural heritage test and salvage excavations, an Aboriginal Cultural Heritage Excavation Report (s), prepared by a suitable qualified expert. The Aboriginal Cultural Heritage Excavation Report (s) must: (a) be prepared in accordance with the Guide to Investigation, assessing and reporting on Aboriginal cultural heritage in NSW, 2011 and the Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales, 2010; and (b) document the results of the archaeological test excavations and any subsequent salvage excavations (with artefact analysis and identification of a final repository for finds) (c) The RAPs must be given a minimum of 28 days to consider the report and provide comments before the report is finalised. The final report must be provided to the Planning Secretary, Heritage NSW, Councils, and the relevant Local Aboriginal Land Council, and the RAPs within 24 months of the completion of the Aboriginal archaeological collections and excavations (both test and salvage).							~
B58	TEMPORARY PROTECTION PLAN Prior to commencement of works, a temporary protection plan prepared by a suitably qualified and experienced consultant shall be submitted to the Certifier. The plan is to identify the potential risks and outlines measures to reduce the potential for damage to significant built, landscape and archaeological elements during site preparation and the works.	~						
B59	HERITAGE CONSULTANT A suitably qualified and experienced heritage consultant is to be commissioned by the Applicant to provide detailed heritage advice to the project for its duration, including providing guidance to the construction documentation, the implementation of the conditions of consent and through the construction process. Written documentation to support the commission of the heritage consultant is to be submitted to the Certifier prior to the commencement of works.	~	Maintained for duration of project	Maintained for duration of project	Maintained for duration of project	Maintained for duration of project		
B60	PROTECTION OF STREET TREES Prior to commencement of works, the street trees on the Worth Place frontage of the site are to be retained and physically protected in accordance with the Council's Urban Forest Technical Manual Note: The tree protection fencing is to remain in place and be maintained until all works have been completed, with no waste materials, washouts, equipment or machinery to be stored within the fenced area.	~	Maintained for duration of project	Maintained for duration of project	Maintained for duration of project	Maintained for duration of project		
B61	CAR PARKING Prior to the commencement of above ground works, the Applicant must submit to the Certifier a Car Parking plan. The plan must demonstrate the provision in the adjacent Wright Lane carpark of the following: (a) a minimum of 6 disabled parking spaces; (b) a minimum of 2 car parking bays dedicated for use as Loading Zone bays; (c) a minimum of 4 car parking spaces to be dedicated for use as Short-term Parking bays; and (d) a minimum of 2 car parking spaces dedicated for use as Ride Share spaces The design of the on-site car parking and vehicular access is to comply with the relevant provisions of the latest version of AS/NZS 2890 -Parking facilities.		·					
B62	ROADS ACT APPROVAL Prior to the commencement of works within the road reserve, a separate application is to be lodged, and consent obtained from Council for all works within the road reserve pursuant to Section 138 of the Roads Act 1993, or other satisfactory arrangements confirmed in writing from Council.					✓		

City Campu	s Student Accommodation							
SSDA Cond	litions of Consent Responsibility Matrix DESCRIPTION	CC1 - Inground	CC2 -	CC3 - Façade	CC4 - Services and	CC5 - Balance of	ос	Operation
COMDITION	PUBLIC DOMAIN WORKS	Works	Superstructure	- CCS - Paçade	Finishes / Fitout	Works		Operation
	Prior to the commencement of Civic Lane public domain works, full details are to be provided to, and consent obtained, or other satisfactory arrangements confirmed in writing, from Council pursuant to Section 138 of the Roads Act 1993 for the following works to be designed and constructed by the Applicant within Civic Lane public road reserve and Worth Place, adjacent to the site, at no cost to Council and in accordance with Council's guidelines and design specifications: (a) a permanent shared path along the Civic Lane frontage of the student accommodation stilled. The design of details must include those works associated works on Worth Place, up to the transition point located east of the proposed student accommodation building. The design details must include those works associated with that portion of the shared path located within the site. (b) a temporary shared path and other associated works from the eastern boundary (transition point) of the student accommodation site to the eastern end of the Newcastle City Campus in the Museum Precinct. (c) phase 1 works of the Civic Lane Concept Proposal as indicated by Council's notations on the Northrop drawing (CC2-C04.01 Rev 3) identified as "Public Domain Works Plan-CN"							
B63	Mark-up Concept-dated 15 April 2025. These works include, but are not limited to, a shared path ramp and footpath continuation at the intersection of Civic Lane and Worth Place, street lighting, kerb extension and streetscape improvements. (d) all the above works in Civic Lane and Worth Place must be designed and constructed generally in accordance with the requirements of 'Public Domain Works Plan-CN Mark-up Concept-dated 15 April 2025'. (e) all associated traffic and parking works. (f) the proposed driveway to the Loading Dock must be designed generally as identified on 'Public Domain Works-CN Mark-up Concept-15 April 2025 to enable both Medium Rigid vehicles and Small Rigid vehicles to drive forward in and reverse out. Plans of the vehicular turning movements of the above vehicles must be provided with the detailed design of Civic					Ý		
	Lane. Engineering design plans and specifications for the works to be undertaken within the public road reserve are to be prepared by a practising professional engineer and associated relevant consultants with experience and competence in the related field, and in compliance with all relevant Australian and NSW standards, guidelines, and technical directions.							
	FLOOD EMERGENCY RESPONSE PLAN Prior to the commencement of above ground works, the Applicant is to submit to the Certifier a Flood Emergency Response Plan for the construction phase of the development. It is to be prepared by a professional engineer, who is experienced in flood management. The plan is to include an education and awareness component for the workforce, detailed evacuation procedures to interface with the Bureau of Meteorology's flood warning system and the local State Emergency Services plan and provisions for any third parties likely to be involved. The flood emergency response plan is to describe the following components:							
B64	(a) the flood emergency responses for the construction phase of the development; (b) likely flood behaviour (c) flood warning systems (d) an education awareness program (e) exacutation and evasion procedures (f) evacutation routes and flood refuges and flood warning system (g) flood preparedness and awareness procedures for employees and contractors Considerations are to include the full range of flood risks, the proposed use of the site, site access constraints and local area evacuation routes to high ground. The plan is to be aimed		*					
	at self-directed evacuation or evasion to minimise the draw on limited State Emergency Services resources. FLOOD REFUGE Prior to the commencement of above ground works, the Applicant is to submit to the Certifier a plan prepared by a suitably qualified and experienced Civil Engineer showing an onsite							
В65	flood refuge. The plan must: (a) demonstrate the level of the refuge is above the level of the Probable Maximum Flood Event; and (b) the design and/or suitability of the refuge is to be structurally certified by the engineer, ensuring that the building is able to withstand the hydraulic loading due to flooding from the Probable Maximum Flood.		~					
	PAST C DURING CONSTRUCTION SITE NOTICE A site notice(s) shall be prominently displayed at the boundaries of the Site for the purposes of informing the public of project details including, but not limited to the details of the Builder,							
C1	Certifier and Structural Engineer. The notice(s) is to satisfy all but not be limited to, the following requirements: (a) the notice is to be able to be read by the general public; (b) the notice is to be rigid, durable and weatherproof and is to be displayed throughout the works period; (c) the approved hours of work, the name of the site/project manager, the responsible managing company (if any), its address and 24-hour contact phone number for any inquiries, including construction/noise complaint are to be displayed on the site notice; and	~	*	√	√	√		
C2	(d) the notice(s) is to be mounted at eve level on the perimeter hoardings/fencing and is to state that unauthorised entry to the Site is not permitted. APPROVED PLANS TO BE ON-SITE A copy of the approved and certified plans, specifications and documents incorporating conditions of approval and certification shall be kept on the Site at all times and shall be readily available to any officer of the Department, Council or the PCA.	·	·	~	~	*		
С3	CONTACT TELEPHONE NUMBER The Applicant shall ensure that the 24-hour contact telephone number is continually attended by a person with authority over the works for the duration of the development. CHECKING FLOOR LEVELS	*	*	√	~	√		
C4	Checking FLOOR Levels During building work, certification is to be prepared by a Registered Surveyor and submitted to the Certifier at the following stages of construction: (a) on completion of ground floor construction, confirming that the floor levels are in accordance with the approved levels. (b) on completion of each subsequent floor level, confirming that the floor levels are in accordance with the approved levels. (c) when the roof has been completed, confirming that the building does not exceed the approved levels. SETTING OUT OF STRUCTURES		·	*	*			
C5	The building shall be set out by a registered surveyor to verify the correct position of the structure in relation to property boundaries and the approved alignment levels. The registered surveyor shall submit a plan to the Certifier, certifying that structural works are in accordance with the approved development application.	*	*					
C6	HOURS OF CONSTRUCTION Construction, including the delivery of materials to and from the site, may only be carried out between the following hours: (a) between 7:00 am and 6:00 pm, Mondays to Fridays inclusive; and (b) between 8:00 am and 1:00 pm, Saturdays.	*	*	*	*	*		
C7 C8	No work may be carried out on Sundays or public holidays. Activities may be undertaken outside of these hours if required: (a) by the Police or a public authority for the delivery of vehicles, plant or materials; or (b) in an emergency to avoid the loss of life, damage to property or to prevent environmental harm. (c) where the works are inaudible at the nearest sensitive receivers; or	<i>*</i>	·	√	·	·		
С9	(d) where a variation is approved in advance in writing, by the Planning Secretary or their nominee, if appropriate justification is provided for the works. Notification of such activities must be given to affected residents before undertaking the activities or as soon as is practical afterwards. Rock breaking, rock hammering, sheet piling, pile driving and similar activities may only be carried out between the following hours:	✓	✓	✓	√	✓		
C10	(a) 9.00 am to 12.00 pm, Monday to Friday; (b) 2.00 pm to 5.00 pm Monday to Friday; and (c) 9.00 am to 12.00 pm, Saturday; IMPLEMENTATION OF MANAGEMENT PLANS	*	*	*	*	*		
C11	The Applicant shall ensure that the requirements of the CEMP, CPTMP, CNVMP, CWMP, AQMP, GMP, UFP and MUFP required by Parts B and C of this consent are implemented during construction. CONSTRUCTION NOISE AND VIBRATION MANAGEMENT The development must be constructed with the aim of achieving the construction noise management levels detailed in the Interim Construction Noise Guideline (Department of	· ·	· ·	✓ ✓	·	<i>*</i>		
C12 C13	Environment and Climate Change, 2009). All feasible and reasonable noise mitigation measures shall be implemented and any activities that could exceed the construction noise management levels shall be identified and managed in accordance with the CEMP and CNVMP. If the noise from a construction activity is substantially tonal or impulsive in nature (as described in Chapter 4 of the NSW Industrial Noise Policy), 5 dB(A) must be added to the measured construction noise level when comparing the measured noise with the construction noise management levels.	· ·	· ·	·	·	·		
C14 C15	Heavy vehicles and oversized vehicles must not queue or idle on Civic Lane or Worth Place outside of construction zones awaiting access to the site. The Applicant must schedule intra-day 'respite periods' for construction activities predicted to result in noise levels in excess of the "highly noise affected" levels, including the addition of	✓ ✓	✓ ✓	✓ ✓	✓ ✓	✓ ✓		
C16	5 dB to the predicted levels for those activities identified in the Interim Construction Noise Guideline as being particularly annoying to noise sensitive receivers. Wherever practical, and where sensitive receivers may be affected, piling activities are completed using bored piles. If driven piles are required, they must only be installed where outlined in the CEMP.	✓	·	√	✓	✓		
C17	Vibration caused by construction at any residence or structure outside the subject site must be limited to: (a) for structural damage vibration to buildings (excluding heritage buildings), British Standard BS 7385 Part 2-1993 Evaluation and Measurement for Vibration in Buildings; (b) for structural damage vibration to heritage buildings, German Standard DIN 4150 Part 3 Structural Vibration in Buildings Effects on Structure; (c) for human exposure to vibration, the evaluation criteria presented in British Standard BS 6472- Guide to Evaluate Human Exposure to Vibration in Buildings (1Hz to 80 Hz) for low probability of adverse comment; and (d) these limits apply unless otherwise outlined in the CNVMP.	,	·	,	,	,		
C18	Vibratory compactors must not be used within 30 metres of residential or heritage buildings unless vibration monitoring confirms compliance with the vibration criteria specified above. These limits apply unless otherwise outlined in the project specific CNVMP required by this consent. EROSION AND SEDIMENT CONTROL.	·	·	√	~	√		
C19	All erosion and sediment control measures are to be effectively implemented and maintained at or above design capacity for the duration of the construction works and until such time as all ground disturbed by the works has been stabilised and rehabilitated so that it no longer acts as a source of sediment. DISPOSAL OF SEEPAGE AND STORMWATER Any seepage or rainwater collected on-site during construction shall be either re-used or disposed of, so as not to cause pollution. Seepage or rainwater shall not be pumped to the	· ·	· ·	√	√	√		
	Any seepage or rainwater contect on-site during construction a rain be either re-used or disposed of, so as not to cause politulori. Seepage or rainwater shall not be pumped to the street stormwater system unless separate prior approval is given in writing by Council. LOADING AND UNLOADING DURING CONSTRUCTION The following requirements apply: (a) all loading and unloading associated with demolition and construction must be accommodated on-site;					·		
C21	(b) a Works Zone is required if loading and unloading is not possible on site. If a Works Zone is warranted an application must be made to the relevant road authority at least 8 weeks prior to commencement of works on the site. Consent for a Works Zone may be given for a specific period and certain hours of the days to meet the particular need for the site for such facilities at various stages of construction. The consent will be reviewed periodically for any adjustment necessitated by the progress of the construction activities COVERING OF LOADS	·	Ý	*	*	*		
C22	All vehicles involved in the excavation and / or demolition process and departing from the property with materials, spoil or loose matter must have their loads fully covered before entering the public roadway. VEHICLE CLEANSING	·	·	~	~	·		
C23	Prior to the commencement of work, suitable measures are to be implemented to ensure that sediment and other materials are not tracked onto the roadway by vehicles leaving the Site. It is an offence to allow, permit or cause materials to pollute or be placed in a position from which they may pollute waters. HOARDING/FENCING REQUIREMENTS The following hoarding requirements must be complied with:	·	~	*	*	*		
C24	(a) no third-party advertising, unless associated with State or Commonwealth Funding of the development or development deeds (such as logos of such associated stakeholders), is permitted to be displayed on the subject hoarding/fencing; and (b) the removal of all graffiti from any construction hoarding/fencing or the like within the construction area within 48 hours of its application. WASTE MANAGEMENT	·	· ·	√	√	*		
C25	Notwithstanding the CVMMP referred to in condition B43, the Applicant must ensure that: (a) all waste generated by the development is classified and managed in accordance with the EPA's Waste Classification Guidelines Part 1: Classifying Waste 2009; (b) all waste generated by the development is treated and/or disposed of at a facility that has sufficient capacity to and may lawfully accept that waste; (c) waste (including litter, debris or other matter) is not caused or permitted to enter the waters of the nearby harbour; (d) any vehicle used to transport waste or excavation spoul from the site is covered before leaving the premises; (e) the wheels of any vehicle, trailer or mobilised plant leaving the site and cleaned of debris prior to leaving the premises; and (f) concrete waste and rinse water are not disposed of on the site and are not caused or permitted to enter the waters of the nearby harbour.	~	~	·	·	·		
C26	The Applicant must ensure that: (a) stockpiles of excavated material do not exceed 4 metres in height; (b) stockpiles of excavated material are constructed and maintained to prevent cross contamination; and (c) suitable erosion and sediment controls are in place for stockpiles.	v	*	~	·	·		
	DUST CONTROL MEASURES Adequate measures shall be taken to prevent dust from affecting the amenity of the neighbourhood during construction. In particular, the following measures should be adopted: (a) physical barriers shall be erected at right angles to the prevailing wind direction or shall be placed around or over dust sources to prevent wind or activity from generating dust emissions; (b) earthworks and scheduling activities shall be managed to coincide with the next stage of development to minimise the amount of time the site is left cut or exposed;							
C27	(c) all materials shall be stored or stockpiled at suitable locations and stockpiles shall be maintained at manageable sizes which allow them to be covered, if necessary, to control emissions of dust and/or VOCa/odour; (d) the surface should be dampened slightly to prevent dust from becoming airborne but should not be wet to the extent that run-off occurs; (e) all vehicles carrying spoil or rubble to or from the site shall at all times be covered to prevent the escape of dust or other material; (f) all equipment wheels shall be washed before exiting the site using manual or automated sprayers and drive-through washing bays; (g) gates shall be closed between vehicle movements and shall be fitted with shade cloth; and	·	·	·	·	·		
C28	(h) cleaning of footbaths and roadways shall be carried out regularly. NO OBSTRUCTION OF THE PUBLIC WAY The public way must not be obstructed by any materials, vehicles, refuse skips or the like, under any circumstances. Non-compliance with this requirement will result in the issue of a	·	·	√	✓	v		
C29	notice by the Planning Secretary to stop all work on site. DAMAGE TO THE PUBLIC WAY Any damage to the public way, including trees, footpaths, kerbs, gutters, road carriageway and the like, must immediately be made safe and functional by the Applicant.	✓	√	√	√	√		
C30	ASBESTOS AND HAZARDOUS WASTE REMOVAL Any hazardous materials, including asbestos, must be identified before demolition work commences and be removed in a safe manner.	v	·	v	v	v		
C31	All materials requiring removal from the site must be classified in accordance with Waste Classification Guidelines (NSW EPA, 2014). The Applicant must ensure that demolition works are undertaken so that cross-contamination of the site does not occur. Removal of asbestos and other hazardous building materials must be undertaken by a suitably licensed contractor and an asbestos clearance certificate must be provided before waste	· ·	· ·	*	· ·	✓ ✓		
C32 C33	classification, disposal or site validation is undertaken. The Applicant must implement the UFP (see condition B54) for the duration of construction. Should any new information come to light during demolition or construction works which has		· ·	· ·	· ·	<i>*</i>		
U33	the potential to alter previous conclusions about site contamination, the Department must be immediately notified and works must cease. Works must not recommence on site until the Department confirms works can recommence.	<u> </u>	<u> </u>	<u> </u>	<u> </u>	<u> </u>

C34	SAFEWORK NSW REQUIREMENTS To protect the safety of work personnel and the public, the work site must be adequately secured to prevent access by unauthorised personnel, and work must be conducted at all times	Works	Superstructure ✓	√	Finishes / Fitout ✓	Works		
C35	in accordance with relevant SafeWork NSW requirements. ABORIGINAL HERITAGE - ACHAR All reasonable steps must be taken so as no to harm, modify or other impact Aboriginal objects except as authorised by this approval.	√	v	v	v	v		
C36	The Registered Aboriginal Parties (RAPs) must be kept informed about the SSD. The RAPs must continue to be provided with the opportunity to be consulted about the Aboriginal Cultural heritage management requirements of the SSD. WATER SUPPLY, TAKE AND LICENSING – DCCEEW – Water	~	v	√	~	~		
C37	Should groundwater be intercepted, a water access license (WAL) must be obtained prior to any take occurring unless an exemption applied under the Water Management (General) Regulation 2018. EMERGENCY MANAGEMENT	As required	As required	As required	As required	As required		
C38	The Applicant must prepare and implement awareness training for employees and contractors, including locations of assembly points and evacuation routes, for the duration of construction. LOCOMOTIVE TURNTABLE – HERITAGE NSW	√	√	·	√	·		<u> </u>
C39	The location of the turntable is to be accurately mapped and the AHD level of the top of the perimeter wall is to be measured. This information is to be used in the development of the landscape design to avoid potential impacts. There are to be no physical impacts to the locomotive turntable as result of the proposed works. This includes impacts related to paving and bedding, soft landscaping, structures and		· ·	,	·	*		
C40	tootings, and services. An exclusion zone is to be established around the turntable during construction to protect it from damage. The establishment of the exclusion zone is to be included in any Construction Environmental Management Plan (CEMP) for the site.	✓ ✓	√	·	✓	· ·		
C42 C43	The location of the locomotive turntable should be accurately identified in the finished works to help prevent future damage to the structure. Interpretation of the locomotive turntable is to be developed in consultation with an experienced heritage practitioner and is to be based on accurate historical information.					√		
C44	HISTORICAL ARCHAEOLOGY – HERITAGE NSW Where works to identify and protect the location of the locomotive turntable require subsurface investigation, these are to be monitored by a suitably qualified historical archaeologist to ensure that the locomotive turntable is not impacted. An Archaeological Method Statement to guide archaeological monitoring and specify measures which will be implemented to protect the turntable is to be included as a part of a Construction Environmental Management Plan (CEMP) for the site. The CEMP is to be provided to the Department for approval prior to the commencement of works within the area of influence of the locomotive turntable.					*		
C45	HERITAGE INTERPRETATION PLAN Following the completion of the archaeology works, a detailed Heritage Interpretation Plan (HIP) prepared by a suitably experienced heritage interpretation practitioner shall be submitted to the Certifier. The HIP must: (a) be in accordance with the Heritage Council's 'Interpreting Heritage Places and Items Guidelines' (2005); (b) build upon the themes and opportunities identified in the Unwelt Heritage Interpretation Strategy (18 June 2024); (c) make allowance for the display of any potential archaeology uncovered during the works; and (d) interpret the multiple uses and history of the various heritage buildings and elements on the site in a way that is engaging, informative and readily accessible to the majority of visitors. PART D PRIOR TO OCCUPATION OR COMMENCEMENT OF USE					·		
D1	NOTICE OF OCCUPATION The date of commencement of the occupation of the development must be notified to the Department in writing, at least one month before occupation. If the operation of the development is to be staged, the Department must be notified in writing at least one month before the commencement of each stage, of the date of commencement and the development to be carried out in that stage. HEIGHT CERTIFICATION						√	
D2	A Registered Surveyor is to certify that the height of the building does not exceed RL 37.53m AHD. Details shall be provided to the Certifier demonstrating compliance with this condition prior to occupation or commencement of use. OPERATIONAL PLAN OF MANAGEMENT						*	
D3	Prior to the occupation or commencement of use, a detailed Operational Plan of Management (OPM) shall be submitted to the Certifier. The OPM must be prepared in consultation with Council. The OPM must address (but not be limited to): (a) management of communal areas and open spaces (see conditions E2 to E6); (b) loading and unloading, security and staff management, emergency management/evacuation and incident response protocols, occupational health and safety, waste management, water management, wayfinding and signage, and lighting; (c) tenant induction and education programs regarding use of the building's environmental systems; (d) community consultation and complaint management; and						*	
D4	(e) management of student move-in and move-outs. TREE PLANTING, LANDSCAPING AND PUBLIC DOMAIN WORKS All tree planting, landscaping and public domain works approved by condition A2, must be completed in accordance with the approved plans, including the detailed landscape plan prior to occupation or commencement of use.						V	
D5	Prior to occupation or commencement of use, structural and waterproofing certifications for the green roof are to be submitted to and approved by the Certifier ROAD DAMAGE The cost of repairing any damage caused to Council or other public authority's assets in the vicinity of the site as a result of construction works associated with the approved development, is to be met in full by the Applicant/developer prior to the commencement of use.						✓ ✓	
D7	UTILITY PROVIDERS Prior to occupation or commencement of the use, written advice shall be obtained from the relevant water supply authority, wastewater disposal authority, electricity supply authority, an approved telecommunications carrier and an approved gas carrier (where relevant) stating that satisfactory arrangements have been made to ensure provision of adequate services.						*	
D8	POST-CONSTRUCTION DILAPIDATION REPORT Prior to occupation or commencement of use: (a) The Applicant shall engage a suitably qualified person to prepare a post-construction dilapidation report at the completion of the construction works. This report to ascertain whether the construction works created any structural damage to adjoining buildings, infrastructure and roads. (b) The report is to be submitted to the Certifier. In ascertaining whether adverse structural damage has occurred to adjoining buildings, infrastructure and roads, the Certifier must: (i) compare the post-construction dilapidation report with the pre-construction dilapidation report required by these conditions and (ii) have written confirmation from the relevant authority that there is no adverse structural damage to their infrastructure and roads. (c) A copy of this report is to be forwarded to the Council and the Planning Secretary and each of the affected property owners.						·	
D9	STRUCTURAL INSPECTION CERTIFICATE A Structural Inspection Certificate or a Compliance Certificate must be submitted to the satisfaction of the Certifier prior to occupation or use of the premises. A copy of the Certificate with an electronic set of final drawings (contact approval authority for specific electronic format) shall be submitted to the approval authority and the Council after: (a) the site has been periodically inspected and the Certifier is satisfied that the Structural Works is deemed to comply with the final design drawings; and (b) the drawings listed on the Inspection Certificate have been checked with those listed on the final Design Certificate/s.						*	
D10	ECOLOGICALLY SUSTAINABLE DEVELOPMENT Unless otherwise agreed by the Planning Secretary, within 12-months of commencement of operation, Green Star certification is obtained demonstrating the development achieves a minimum 4-star (or aspirational 5-star) Green Star Buildings v1 rating. If required to be obtained, evidence of the certification must be provided to the Certifier and the Planning Secretary.						√	
D11	MECHANICAL VENTILATION Following completion, installation and testing of all the mechanical ventilation systems, the Applicant shall provide evidence to the satisfaction of the Certifier, prior to occupation or commencement of use, that the installation and performance of the mechanical systems complies with: (a) the NCC; (b) Australian Standard AS1668 and other relevant codes; (c) the development consent and any relevant modifications; and, (d) any dispensation granted by Fire and Rescue NSW.						*	
D12	CRIME PREVENTION THROUGH ENVIRONMENTAL DESIGN Prior to occupation or commencement of use, evidence shall be submitted to the Certifier demonstrating the recommendations of the CPTED Report, prepared by Ethos Urban, dated 22 November 2024 have been implemented.						~	
D13	WIND MITIGATION MEASURES Prior to occupation or commencement of use, evidence shall be submitted to the Certifier demonstrating compliance with all wind mitigation recommendations of the Pedestrian Wind Environment Assessment, prepared by Windtech Consultants dated 15 July 2024.						~	
D14	FIRE SAFETY CERTIFICATION Prior to the occupation or commencement of use of the development, a Fire Safety Certificate shall be obtained for all the Essential Fire or Other Safety Measures forming part of this consent. A copy of the Fire Safety Certificate must be submitted to the relevant authority and be prominently displayed in the building.						~	
D15	SANITARY FACILITIES FOR DISABLED PERSONS Prior to occupation or commencement of the use, details must be provided to the Certifier demonstrating that the provision of sanitary facilities for disabled persons within the premises complies with Section F2.4 of the NCC and condition B34.						v	
D16	WASTE AND RECYCLING COLLECTION Prior to occupation or commencement of use, the building owner must ensure that there is a contract with a licensed contractor for the removal of all trade waste. No garbage is to be placed on the public way e.g. the roadways, footpaths, through-site link and reserves at any time.						·	
D17	Prior to occupation or commencement of use, the Certifier must ensure that waste handling works have been completed in accordance with the OWMP. ACOUSTIC COMPLIANCE Prior to occupation or commencement of, evidence shall be submitted to the Certifier demonstrating compliance with all noise mitigation measures required under condition B22 to						√	
D19	ensure the development achieves compliance with the requirements of the NSW Industrial Noise Policy and other guidelines applicable to the development. EXTERNAL WALLS AND CLADDING FLAMMABILITY Prior to occupation or commencement of use, evidence shall be submitted to the Certifier demonstrating all external walls of the building, including cladding, comply with the relevant						·	
D20	requirements of the NCC, consistent with the requirements of condition B18. PROTECTION OF PUBLIC INFRASTRUCTURE Unless the Applicant and the applicable authority agree otherwise, the Applicant must:							
J20	(a) repair, or pay the full costs associated with repairing, any public infrastructure that is damaged by carrying out the development; and (b) relocate, or pay the full costs associated with relocating any infrastructure that needs to be relocated as a result of the development REFLECTIVITY						· ·	
D21	Prior to occupation or commencement of use, evidence shall be submitted to the Certifier demonstrating that the building materials have a maximum normal specular reflectivity of visible light of 20 per cent or consist of alternate materials / mitigation measures that so that the facades of the building do not result in glare that causes any discomfort or threatens the safety of pedestrians or drivers. VERIFICATION OF ACOUSTIC PERFORMANCE – PORT AUTHORITY						√	
D22	Prior to occupation or commencement of use, verification be provided to the consent authority that the development has achieved its required acoustic performance for all living/dining and sleeping areas.						~	
D23	GREEN TRAVEL PLAN - TrNSW Prior to occupation or commencement of use, the Green Travel Plan (prepared by SECA Solutions, version Ver04, dated 11 July 2024) shall be updated to include: (a) An Implementation Plan section with committed actions ready for implementation from the first day of occupancy; and (b) A Travel Survey included as a separate appendix. The survey should be included in the Implementation Plan and distributed three (3) months post-occupancy to both staff and students. The survey should include questions to obtain residential postcodes to identify origin and extination patterns to inform strategies that aim to increase the use of public and active transport by staff and visitors driving to and from the site. Questions regarding interest in initiatives promoting sustainable transport should also be used here; and (c) Additional information about walking and cycling routes toriform and around the site; and (d) A website link to the Travel Access Guides (TAGs) as referred to in condition D26 shall be included as an appendix in the GTP. The updated Green Travel Plan shall be provided to and endorsed by TfNSW. A copy of the final plan shall be submitted to the Planning Secretary. Details demonstrating compliance with these requirements must be submitted to the Certifier prior to occupation or commencement of use.						*	
D24	The GTP will need to be appropriately funded and otherwise resourced, by the applicant, for a period of at least 5 years, or via an appropriate appointed entity. This will include ongoing travel demand initiatives in the Implementation Plan that will require resourcing. This is in recognition that any travel demand management interventions will need to be significant in scale to be effective.						~	
D25	scale to be effective. A Travel Plan Coordinator (TPC) shall be appointed for the life of the development who will manage the GTP from the first day of occupancy. Further consideration should also be given to having other staff involved to ensure the GTP is adequately monitored and evaluated, as well as implementing strategies if the TPCs change over the lifecycle of the development.						~	
D26	TRANSPORT ACCESS GUIDE - TrNSW Prior to occupation or commencement of use a Transport Access Guide must be prepared in consultation with TfNSW. The Transport Access Guide shall include the following: (a) Additional information about service routes and timetables for buses, light rail, and trains to and from the site. (b) Additional information about service routes and timetables for university shuttle buses to and from the site. (c) Promotes blike parking and End of Trip facilities (EoT) such as showers, lockers and change rooms. (d) Does not promote parking areas where staff, students and visitors can park. (e) Suitable nearby drop-off/pick-up locations; and (f) Identify areas where drop-off/pick-up is prohibited and instruct visitors to avoid use of these areas; and (g) Suitable nearby Tay Zones. The Travel Access Guide shall be provided to and endorsed by TfNSW.						·	
	A copy of the final plan shall be submitted to the Planning Secretary. Details demonstrating compliance with these requirements must be submitted to the Certifier prior to occupation or commencement of use. NO OBSTRUCTIONS – PUBLIC DOMAIN							
D27	All public footways and paths of travel must be free from obstructions. If services are required to be relocated to clear paths of travel, then this must be undertaken at the developer's expense. All obstructions are to be removed prior to occupation or commencement of use.						✓	1

(f) all works/regulatory signposting associated with the proposed developments shall be at no cost to the relevant roads authority. FLOOD EMERGENCY RESPONSE PLAN - OPERATIONAL				
The Prior to the occupation or commencement of use, the Applicant is to submit to the Certifier a Flood Emergency Response Plan for the operational phase of the development. It is to be prepared by a professional engineer, who is experienced in flood management. The plan is to include an education and awareness component for the workforce, detailed evacuation procedures to interface with the Bureau of Meteorology's flood warning system and the local State Emergency Services plan and provisions for any third parties likely to be involved.				
The flood emergency response plan is to describe the following components: (a) the flood emergency responses for the operational phase of the development;				
D40 (b) likely flood behavlour; (c) flood warning systems; (d) an education awareness program;			·	
(e) evacuation and evasion procedures; (f) evacuation routes and flood refuges and flood warning system; and]		
(g) flood preparedness and awareness procedures for residents, visitors, staff and the like. Considerations are to include the full range of flood risks, the proposed use of the stile, site access constraints and local area evacuation routes to high ground. The plan is to be aimed at self-directed evacuation or evasion to minimise the draw on limited State Emergency Services resources.]		
PART E POST OCCUPATION OPERATIONAL OPERATIONAL PLAN OF MANAGEMENT				J
The OPM (see condition D3) and all relevant plans must be fully implemented during use of the premises. OPERATIONAL RESTRICTIONS The use of the communal facilities, including the rooftop terrace on level 1 is restricted to staff, residents and their guests.				· ·
E3 Amplified noise/music is prohibited within external terraces and only low-level background music is permitted in internal communal areas. E4 Alcohol is prohibited to be consumed within the building, except within student rooms and the internal communal areas.				✓ ✓
E5 Internal speakers must not be placed to direct the playing of music towards the public domain or outdoor areas associated with the premises. E6 Noise associated with the operation of the development shall not give rise to the transmission of "offensive noise" as defined in the Protection of the Environment Operations Act 1997.				✓ ✓
NOISE CONTROL – PLANT AND MACHINERY Noise associated with the operation of any plant, machinery or other equipment on the site, shall not give rise to any one or more of the following:				
(a) transmission of "offensive noise" as defined in the Protection of the Environment Operations Act 1997 to any place of different occupancy; E7 (b) a sound pressure level at any affected residential property that exceeds the background (LA90, 15 minute) noise level by more than 5dB(A). The background noise level must be measured in the absence of noise emitted from the premises. The source noise sessed as a LAeq, 15 minute; and]		~
(c) notwithstanding compliance with (1) and (2) above, the noise from mechanical plant associated with the premises must not exceed 5dB(A) above the background noise level between the hours of 12.00 midnight and 7.00 am.				
LOADING AND UNLOADING E8 All loading and unloading operations associated with the site must be carried out: (a) in a manner so as not to cause inconvenience to the public or detrimentally impact the amenity of the locality.				~
E9 WASTE MANAGEMENT Waste Management shall be undertaken in accordance with the OWMP.				✓
The public way must not be obstructed by any materials, waste, vehicles, refuse, skips or the like under any circumstances. OUTDOOR FURNITURE				√
E11 Lightweight furniture is not permitted within communal open space areas unless securely attached to the floor slab. Use of loose glass-tops and lightweight sheets or covers is not permitted ANTI-GRAFFITI		 		~
Where possible all ground level surfaces are to be treated with anti-graffiti coating to minimise the potential of defacement. In addition, any graffiti evident on the exterior facades and visible from a public place is to be removed within 48 hours.				~
PLAN OF MANAGEMENT FOR LANDSCAPE MAINTENANCE E13 Within six months of the issue of occupation, a Plan of Management for the ongoing maintenance of landscaped areas and tree planting is to be prepared and adopted by the operator of the student accommodation.				✓
TRANSPORT ACCESS GUIDE E14 The Transport Access Guide shall be implemented and maintained by the operator of the student accommodation and be made available to staff, guests, clients, customers, and visitors at all times.				√
				√

AN7	COMMONWEALTH ENVIRONMENT PROTECTION AND BIODIVERSITY CONSERVATION ACT 1999 (a) The Commonwealth Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act) provides that a person must not take an action which has, will have, or is likely to have a significant impact on a matter of national environmental significance (NES) matter, or Commonwealth land, without an approval from the Commonwealth Environment Minister. (b) This application has been assessed in accordance with the EP&A Act. The determination of this assessment has not involved any assessment of the application of the Commonwealth legislation. It is the Applicant's responsibility to consult the Department of Sustainability, Environment, Water, Population and Communities to determine the need or otherwise for Commonwealth approval and you should not construe this grant of approval as notification to you that the EPBC Act does not have application. The EPBC Act may have application and you should obtain advice about this matter. There are severe penalties for non-compliance with the Commonwealth legislation.
