

UNIVERSITY OF
NEWCASTLE

JOINT MEDICAL PROGRAM (JMP)

Collaborative Medical Education for Regional Health Impact

The Joint Medical Program (JMP) is a partnership between the University of Newcastle and the University of New England, delivering world-class medical education with a focus on rural and regional health outcomes. The program integrates clinical training, community engagement, and research to produce highly skilled medical professionals.

PARTNERSHIP CAPABILITIES

- **Integrated Clinical Training:** Hands-on experience across regional hospitals and health services
- **Community Engagement:** Programs designed to address local health challenges
- **Research Collaboration:** Opportunities for translational research in medical sciences
- **Education Innovation:** Use of simulation and digital platforms for medical training

PROVEN IMPACT

- **Graduate Success:** Over 2,000 graduates serving in diverse medical fields
- **Regional Health Outcomes:** Improved access to healthcare in underserved communities
- **Recognition:** National awards for excellence in medical education

BREAKING BARRIERS: INDIGENOUS STUDENT'S JOURNEY TO ORTHOPAEDIC SURGERY

Kieran Cubby, a proud Wiradjuri/Murrawarri man from Dubbo, is on a determined path to becoming an orthopaedic surgeon – a dream that once seemed out of reach. Achieving his dream is no mean feat. But, the University of Newcastle student is committed to overcoming any hurdles, and with the help of financial support through the University of Newcastle's Commonwealth Supported Places (CSP) postgraduate initiative for Indigenous students, it's one less hurdle Kieran needs to jump.
