Make a difference to peoples' health and wellbeing

Pursuing a degree in health, nursing, or medicine opens numerous opportunities for a rewarding career that is in high demand globally. As populations grow, the need for skilled healthcare professionals increases. This field encourages continuous learning and professional growth as you join a supportive community of individuals who share your passion for helping others.

Xinyue Wen, China
Master of Nursing

Why study Health and Medicine

One of the most rewarding aspects of studying a health or medical program is the opportunity to make a positive impact on people's lives. Healthcare professionals play a crucial role in improving the health and wellbeing of individuals and communities. Australia has one of the best healthcare systems in the world¹ and the University of Newcastle offers a wide range of internationally accredited health-related programs, including Medicine, Nursing, Speech Pathology, Public Health, Pharmacy, Social Work, Nutrition and Dietetics, Physiotherapy, Occupational Therapy, and more.

Australian health qualifications are highly respected by employers worldwide. With an ageing population and a growing need for healthcare services, there is a high demand for qualified healthcare professionals in Australia. Workforce demand in Australia's healthcare and social assistance sector is predicted to increase by 15.8% over the next five years².

It is also predicted that the healthcare industry will experience major workforce shortages³. This means there are plenty of job opportunities available for graduates.

Careers and skills

A successful career in Nursing, Health and Medicine not only relies on outstanding training and technical skills, but it also requires strong communication, leadership, and problem-solving skills, which can benefit students in all areas of their lives.

When you graduate from the University of Newcastle you can be assured that your transferable skills combined with world-class qualifications allow you to choose your career path and pursue your passions.

Newcastle and Hunter Region Snapshot

Future growth and development for the region¹

Health and Education are among the largest and fastest-growing sectors, with job numbers expected to rise from 63,000 to 73,000, making up 21% of the workforce by 2036. The Hunter region is experiencing significant growth through key projects that will boost its economy.

- **John Hunter Health and Innovation Precinct** which features industry-leading facilities that support communities across the Hunter and Northern New South Wales (NSW).
- **Enhanced Regional Linkages:** Improvements in transport corridors and freight facilities will facilitate economic growth, making it easier for businesses to operate and expand.
- **Planned expansion of Newcastle Airport by 2030** which will see it double, expanding the region's tourism industry and enhancing connections with the Asia-Pacific.
- **Home to world-class research institutions** including the University of Newcastle, Hunter Medical Research Institute (HMRI), Commonwealth Scientific and Industrial Research Organisation (CSIRO) and Newcastle Institution for Energy and Resources (NIER).

The region's strategic growth areas include advanced manufacturing, creative industries, defence and aerospace, food and agribusiness, medical technology and pharmaceuticals, mining equipment and services, and renewable energy.

These initiatives will not only drive economic success but also create new opportunities for innovation and collaboration for the health and medical industry.

Local Health and Medical organisations

With engagement at the heart of the University's values, students studying Health and Medicine learn within a supportive regional health community across Newcastle and the Central Coast. The region's hospitals, health services, research centres and community providers offer opportunities for students to engage with real world health settings as part of their studies.

Newcastle (NSW)

- John Hunter Hospital
- Calvary Mater Newcastle
- Newcastle Private Hospital
- Hunter New England Local Health District

Nursing Director	168,000 AUD
Nursing Supervisor	111,000 AUD
Occupational Therapist	123,000 AUD
Respiratory Manager	142,000 AUD
School Nurse	67,300 AUD

What the university of Newcastle can offer

Health and medicine services are constantly evolving, with new discoveries, technologies, and treatments emerging all the time. Studying health and medicine at the University of Newcastle can provide you with the knowledge and skills to enter the workforce today as a highly trained expert but also adapt to these changes and continue to grow and learn throughout your career.

Partnership with HMRI

The Hunter Medical Research Institute (HMRI) supports the Hunter's internationally recognised health and medical research, education and training. HMRI is a multidisciplinary partnership between the University of Newcastle, Hunter New England Local Health District and the community. Established in 1998, HMRI facilitates collaborations between researchers translating scientific advances into better clinical care, competitive commercial products and improved health care guidelines.

Central Coast (Gosford Hospital)

Gosford Hospital is a nation-leading health, medicine and wellbeing teaching and education facility, operating alongside the Central Coast Research Institute. The campus offers immersive learning environments for medicine, midwifery and nursing students, working closely with local industry partners.

Hunter Medical Research Institute

The Health Education and Research Building (HERB)

Our newly refurbished Health Education and Research Building includes cutting-edge simulation labs, high-tech facilities, and hands-on teaching spaces where our future nurses, midwives and allied health professionals learn.

Bioresearch Building, Callaghan Campus

Priority Research Centres

The University of Newcastle is home to world-renowned researchers and priority research centres, including:

- Brain and Mental Health Research
- Cancer Research, Innovation and Translation
- Cardiovascular Health
- Centre for Women's Health Research
- Digestive Health and Neurogastroenterology
- Drug Development
- Grow Up Well
- Healthy Lungs
- Health Behaviour
- Physical Activity and Nutrition
- Reproductive Science
- Stroke and Brain Injury; and more

This means we are at the forefront of health and medical research, so you will be actively learning from industry leaders making exciting new discoveries.

Our clinical network

Our extensive clinical network means our students can undertake their clinical placements in urban, regional and rural settings across Australia.

This mix of major metropolitan hospitals, as well as regional and remote hospitals and clinics, exposes students to various healthcare practices and challenges across the healthcare system. As a result, students develop a broader range of skills and knowledge through hands-on learning and active participation in real-world experiences. These placement opportunities foster valuable networking opportunities and allow students to connect with healthcare professionals from different backgrounds and specialties.

Our clinical partners

Central Coast Local Health District, located between Sydney and the Hunter Valley, provides essential public health services to the community. It includes two acute hospitals: Gosford Hospital, the principal referral and regional trauma centre, and Wyong Hospital, a major metropolitan facility. Woy Woy Hospital offers sub-acute care, supported by eight community health centres and additional services.

**Central Coast
Local Health District**

Hunter New England Local Health District offers a variety of public health services across the Hunter, New England, and Lower Mid North Coast regions. With over 18,000 employees and volunteers serving nearly one million people, the district aims to achieve carbon and waste neutrality by 2030 and improve healthcare access for Aboriginal and Torres Strait Islander communities.

The district includes one tertiary referral hospital in Newcastle, four rural referral hospitals in Maitland, Manning, Tamworth, and Armidale, along with 20 community hospitals and several mental health facilities. This diverse area, featuring a major metropolitan centre and various regional and rural communities, provides excellent opportunities for medical students to engage in clinical placements.

**Hunter New England
Local Health District**

Clinical placements

Clinical placements in accredited health professional degrees provide hands-on experience in your chosen field, supervised by experienced professionals. These placements are essential for undergraduates, as they help you develop a wide range of clinical skills. To graduate, students must complete a specific number of placement hours in various settings, ensuring a well-rounded education.

International scholarships

We are proud to offer both affordable tuition fees alongside competitive scholarships to support students in their studies. Scholarships can reduce the cost of tuition making the University of Newcastle one of the more affordable options to study in Australia.

Find out more
about scholarships.

“The scholarship relieved financial burdens for me and my family, allowing me to continue my degree and focus on my studies.”

Krishna Paudel, Nepal
Bachelor of Nursing

20% Scholarship tuition fee waiver*

International Excellence Scholarship

International Excellence Scholarship The International Excellence Scholarship* celebrates academic excellence and supports your journey to success with ongoing financial assistance.

The scholarship is awarded annually, based on 20% of the gross international tuition fee, and is calculated per course under a standard full-time study load (80 units), with the unit value varying depending on your specific program.

Build your career

Recognising the rapidly changing environment our students will enter upon graduation, our education experience will prioritise developing life-ready graduates who are community-minded, resilient, and work-ready.

Career support

University services like Career Connect link you with over 100 extra-curricular experiences that will help you build additional skills that employers are looking for, such as Leadership, Teamwork, Resilience and Self-management.

Careers service

Whether it is career counselling, finding job opportunities, job application assistance or interview preparation, the University's Careers Service is here to help. You can also take advantage of CareerHub online, where employers post opportunities for graduate employment, part-time experience, and paid internships.

Connect with industry

There are so many ways to connect with industry and expand your networks while you study. Attend career exhibitions and industry events and meet graduate recruiters to help you transition into the professional world. Access networking opportunities such as iLEAD and make use of the University's strong partnerships with industry. Tap into the University's global alumni network and build relationships to elevate your career.

"Besides our lab sessions and internal placement sessions at our student clinic, we also went for external clinical placements at public and private practices.

We were given a lot of exposure to the industry through external placements and the annual podiatry industry day organised by the University."

Hazel Chua, China
Bachelor of Podiatric Medicine

Amal, India
Master of Nursing

Clubs and societies

Get involved with the clubs and societies across our campuses and develop your interpersonal and teamwork skills to stand out from other job candidates. Some of the clubs include the Bachelor of Biomedical Science Society, Doctors for the Environment, HMRI PhD Student Association, Medical Radiation Society, Medical Society and the Newcastle Obstetrics & Gynaecology Society.

Part-time work opportunities

Jobs on campus

Working at the University is a great way to earn money and develop your employability skills in a professional workplace. The Jobs on Campus page on the University website advertises a wide range of paid roles throughout the year.

Finding work in Australia

The Finding Work in Australia program is aimed at supporting international students to develop self-awareness, identify opportunities and improve their employability in the Australian market. The program is delivered through a series of three workshops and accompanying online resources. If you join, you will also be invited to book an individual follow-up career consultation to discuss career goals and strategies.

Intake S1

Course overview

Diagnostic radiographers create medical images to diagnose and manage patient health to save and improve lives. They play an important role in medicine and health care and contribute significantly to improving community health. Students will develop essential clinical reasoning and patient management skills and have access to the latest diagnostic radiography technologies. Some of these include plain x-rays, computed tomography (CT), fluoroscopy, magnetic resonance imaging (MRI), ultrasound, angiography and mammography. With over 30 years of industry experience, our expert educators will inspire you and ensure you stay at the forefront of emerging research in diagnostic radiography.

Practical experience

You will complete 40+ weeks of clinical placement throughout the degree, starting in first year.

Professional recognition

Graduates of this program are eligible to apply for registration with the Medical Radiation Practice Board with the Australian Health Practitioner Regulation Agency (AHPRA). Board registration standards must be met in order to practice in Australia.

How to apply

Apply early to secure your place. Late applications will be deferred to the next available intake. Start your journey at the University of Newcastle in just a few easy steps. Scan the QR code to find out more.

1

Find your agent

The University of Newcastle has a list of education agents that are located around the world and are able to assist you with your application.

Students from some regions are required to lodge their applications via education agents as direct applications will not be accepted.

2

Program handbook

Check out the program handbook for your preferred degree.

3

Review what you need to apply

4

Check key dates

5

Register on the portal and complete the online form.

If applying without an agent, upload coloured copies of all supporting documentation.

6

Assessment

Your application will be assessed to determine if you meet the academic, English proficiency and any other relevant requirements for admission to the University and your desired program.

Outcome

You will be notified of the outcome of your application via email. If your application is successful, you will receive an offer letter from the University.

Conditional offer letter – upload the outstanding documents on the action item to meet the conditions of your offer.

8

Accept your offer

Log in to the portal to accept your offer, upload your signed acceptance form, and pay the deposit using the link provided in your offer letter.

9

Receive your CoE

You will receive an email confirming your acceptance, along with instructions to activate your student account. This email will also include your Confirmation of Enrolment (CoE), which you will need to apply for your student visa.

Apply for your visa
