AUSTRALIA'S FORGOTTEN ANZACS

Lost images from Australia's first conflict – the fall of German New Guinea

A recent exhibition of lost images documenting the first military conflict of the First War - the fall of German New Guinea – has generated huge community interest. The exhibition was held in the University Gallery between the 25th of March and the 11th of April, and the simultaneous release of the images on the Library's Cultural Collections Flickr generated more than 119,000 page hits in the first day.

Thomas James Rodoni's glass plate negatives were unearthed from under a house in Speers Point by Thomas Rodoni's son Bill, and given to the Library's Cultural Collections in 2014 – one hundred years after the start of WW1.

This extremely rare collection is by one of the few non-official photographers during the war. It includes many candid shots that capture the atmosphere of pre-war Sydney and its surrounds.

The University Gallery and the Library's Cultural Collections acknowledge the support of the late Bill Rodoni and his family and Chris and Frances Fussell in bringing this extraordinary collection to light. The recent exhibition is part of a series of events celebrating the University of Newcastle's 50th anniversary in 2015.
