PROGRAM PLAN

BACHELOR OF CHEMICAL ENGINEERING (HONOURS)

To be eligible to graduate make sure you have completed 320 units (10 units = 1 course unless otherwise specified) which meet the following criteria:

- **Core courses** – 280 units

  * Enrolment in MATH courses is based on your assumed knowledge. To find out which MATH courses you should enrol in please see the **Enrolling in Maths information**. More information in your **Program Handbook**.

  ** PHYS courses. Students may count PHYS1205 in lieu of PHYS1210 with Program Convenor approval.

  Please also note the following regarding the multi-term sequence courses research courses:
  - CHEE4945A Chemical Engineering Design A (10 units) and CHEE4945B Chemical Engineering Design B (10 units) must be completed in consecutive terms.
  - CHEE4975A Chemical Engineering Research A (10 units) and CHEE4975B Chemical Engineering Research B (10 units) must be completed in consecutive terms.

- **Elective Pathway** – 40 units, visit the **Program Handbook** for more information. Please be aware of the 120 unit maximum for 1000 level courses in your program when selecting your elective courses.

- It is also a compulsory program requirement that students complete a total of 12 weeks of **industrial experience**.

- The duration of this program is 4 years full-time (40 units per semester) or part-time equivalent.

- The maximum time to complete this program is 10 years.

Some courses have assumed knowledge and/or requisites, please refer to the individual **Course Handbook**. Please refer to the **Program Handbook** for specific information on program structure. If you are intending varying from this program plan please seek advice from your **Program Advisor**.
