NEWCASTLE

KNOWLEDGE EXCHANGE AND ENTREPRENEURSHIP

Accelerating Research Impact Through Collaboration and Commercialisation

Knowledge Exchange and Entrepreneurship (KEE) enables researchers, students, and innovators at the University of Newcastle to translate their research outcomes into real-world impact. By fostering partnerships, facilitating commercialisation, and supporting entrepreneurship, KEE acts as a bridge between research ideas and partner solutions, driving economic and societal transformation.

RESEARCH COLLABORATION

- Access cutting-edge knowledge and expertise
- Reduce risk through shared innovation
- Solve complex challenges collaboratively
- Accelerate product and service development
- Leverage world-class research infrastructure

COMMERCIALISATION

- Acquire market-ready research products
- Licence proven intellectual property
- Generate new revenue and growth streams
- Gain a competitive advantage
- Attract investors and strategic partners

ENTREPRENEURSHIP

- Join a community of founders, mentors and investors
- Develop enterprise skills and business know-how
- Validate a new product or service
- Build your startup in a supportive environment
- Co-work alongside other innovators

PIONEERING CLEAN AMMONIA PRODUCTION

Facet Amtech is leading the transition towards clean ammonia production, leveraging advanced catalyst technology. Their breakthrough solution significantly reduces the environmental impact of ammonia production and enhances efficiency, paving the way for green ammonia reactors. As the first spinout company launched under the University's new Spinout Framework, Facet Amtech highlights the transformative potential of research outputs translated into real-world solutions. As an I2N Accelerator graduate, Facet Amtech embodies the spirit of innovation and entrepreneurship that drives KEE's mission to create a lasting impact on our communities.
