## UON LEADERSHIP FRAMEWORK

The [UoN Leadership Framework](#) outlines a set of leadership capabilities to support the strategic direction of the University through building leadership capability, a shared agenda and a strong leadership culture. HRS can support you in embedding the Leadership Framework into your Division/Faculty/School in the following ways:

### Leadership Framework Workshops

This two hour workshop for Managers and their teams can be tailored to suit your particular work context. It will focus on the application of the Leadership Framework within the development planning process.

### Staff Presentations at Division/Faculty/School Level

This presentation will provide detail regarding implementation of the Leadership Framework and how it can be used in development planning through the PRD process.

### Short Presentation to Senior Leadership Group

A representative from HR can attend your Senior Leadership Meeting to provide a short presentation on the Leadership Framework and its use in development planning.

### Individual Support through HR Business Partners

The leadership framework function is now available in the PRD online system and supervisors can use this function to facilitate their mid-year development discussions. HR Business Partners can provide individual guidance on how best to apply the framework to development planning.
