

PROGRAM PLAN

BACHELOR OF MECHANICAL ENGINEERING (HONOURS)

PROGRAM OPTION:

Full time or part time

START DATE:

Semester 1 2017 - 2020

LOCATION:

Callaghan

This program plan is an enrolment guide to ensure you are on track to graduate. If at any time you wish to vary from this program plan seek advice from your Academic Program Advisor to ensure you remain on track.

COMPULSORY REQUIREMENT: EXPOSURE TO PROFESSIONAL PRACTICE (EPP)/INDUSTRIAL EXPERIENCE (IE) 12 WEEKS

PROGRAM PLAN

BACHELOR OF MECHANICAL ENGINEERING (HONOURS)

To be eligible to graduate make sure you have completed 320 units (10 units = 1 course unless otherwise specified) which meet the following criteria:

- **Core courses** – 280 units

Math courses – 20 units *

* **Prior to 2021**, students could choose to complete either MATH1110 and MATH1120, **OR** MATH1210 and MATH1220. Choice of maths courses is based on your assumed knowledge. To find out which MATH course you should enrol in please see the [Enrolling in Maths information](#). More information is in your [Program Handbook](#). Note that due to course offerings it is recommended midyear commencing students take MATH1110 and MATH1120, and that you also consider the University's [Summer School](#) offerings following your first semester.

After 2021, the option to do MATH1210 and MATH1220 has been removed from the program. **From 2021 onwards:** 1) if you have not yet completed MATH1210 you must complete MATH1110; and 2) if you haven't completed MATH1220 then you must complete MATH1120.

Students are required to complete just one of these two courses. Refer to the transition document in the [Program Handbook](#) for further information.

- **Electives** – 40 units. You may need to study at least 10 units of electives at the **2000 level or higher**, depending on the core courses you have, or will, complete (which includes having received credit). Please add up the amount of 1000 level core courses you have, or will, complete (which includes having received credit); if this totals 80 units, there are no restrictions on the level of electives you study. If it totals 90 units, at least 10 units of electives must be **2000 level or higher**.

Some suggested electives include:

- **MECH3130** Mechanics of Bulk Solids and Particulates
- **MECH4220** Bulk Materials Handling and Transportation
- **MECH4580** Computer Aided Engineering and Manufacturing (*please see the course handbook for enrolment restrictions*)
- **RENE3000** Solar and Wind

Visit the [Program Handbook](#) and [Course Handbook](#) to see a list of all available courses from which you may choose electives

Please note, if you completed **MATH1002** this counts as 10 units of electives

- Students must not exceed 120 units at 1000 level in this degree
- **Students must undertake 12 weeks of approved industrial experience**
- The duration of this program is 4 year full-time (40 units per semester) or part-time equivalent
- The maximum time to complete this degree is 10 years

Some courses have assumed knowledge and/or requisites, please refer to the individual [Course Handbook](#). Please refer to the [Program Handbook](#) for specific information on program structure. If you are intending varying from this program plan please seek advice from your [Academic Program Advisor](#).
