Students with disability or chronic medical condition – who are they and where are they?

There are many students whose disability or chronic medical condition impacts on their study & learning:

- Students may be in mainstream classes, support classes, or at a school for specific purposes
- They may or may not be funded to receive support services
- They may or may not receive disability provisions at school
- They may be diagnosed with one or more disabilities or chronic medical conditions, including:
  - Chronic Medical Conditions (eg Asthma, Diabetes, Cancer, Crohn’s Disease, Arthritis)
  - Intellectual disability (eg Down Syndrome, Fragile X Syndrome, Fetal Alcohol Syndrome)
  - Learning disability (eg Dyslexia, Dysgraphia)
  - Mental Health Conditions (eg Depression, Anxiety Disorders, Schizophrenia, Bipolar Disorder)
  - Neurological conditions (eg Multiple Sclerosis, Epilepsy, Autism Spectrum Disorder)
  - Physical disability (eg Spinal Cord Injury, Cerebral Palsy)
  - Sensory disability (eg Hearing, Vision)

Encourage
- How many students is that in your class or school?
- With your support, students can access many resources and services that will help them make a successful transition to their chosen post-school pathway
