

# Exam preparation template

- Print out and fill in by hand to prepare for a written exam.
- Using only the space provided in each box means you have to synthesise (condense) the main topics and information.
- This is more useful for exams as you will get practice writing about the topics instead of attempting to memorise information from your course notes.

<b>Lecture Topic</b>	<b>What did you learn from the readings, course materials, videos, worksheets?</b> Concepts, new vocabulary	<b>What did you learn at the lecture/lectorial/tutorial?</b> Concepts, theories, differences, similarities	<b>What did you learn in the lab/practical session?</b> Application of concepts, practical skills <b>No practical in your course? Leave this blank.</b>	<b>What exam question/s could be asked about this topic?</b> Design your own questions using the concepts from each week
<p><b>Example –</b> Week 2 What is ECEC? Who do we think children are? What is the role of EC educators?</p>	<p>EC is situational and temporal. Varies between cultures and time periods. Reading 1 had info on different forms of EC in different countries.</p>	<p>Ideas about different forms of ECEC? Concepts of 'child', early education, historical developments and perspectives?</p>	<p>School obsv. At GSELC Nursery room Tues. pm. ELYF 3.2 for L, E and J L comm's expression of needs E seems to be taking a back seat to other chln. J having difficulties with gross motor skill in play area – speak to room leader</p>	<p>Describe two theories of EC education. What are the differences and similarities? Which theory was in use at the centre where you were observing for your practical. Give three examples of how the theory was applied.</p>
<p>Week 1</p>				

Lecture Topic	What did you learn from the readings, course materials, videos, worksheets? Concepts, new vocabulary	What did you learn at the lecture/lectorial/tutorial? Concepts, theories, differences, similarities	What did you learn in the lab/practical session? Application of concepts, practical skills <b>No practical in your course? Leave this blank.</b>	What exam question/s could be asked about this topic? Design your own questions using the concepts from each week
Week 2				
Week 3				

Lecture Topic	What did you learn from the readings, course materials, videos, worksheets? Concepts, new vocabulary	What did you learn at the lecture/lectorial/tutorial? Concepts, theories, differences, similarities	What did you learn in the lab/practical session? Application of concepts, practical skills <b>No practical in your course? Leave this blank.</b>	What exam question/s could be asked about this topic? Design your own questions using the concepts from each week
Week 4				
Week 5				

Lecture Topic	What did you learn from the readings, course materials, videos, worksheets? Concepts, new vocabulary	What did you learn at the lecture/lectorial/tutorial? Concepts, theories, differences, similarities	What did you learn in the lab/practical session? Application of concepts, practical skills <b>No practical in your course? Leave this blank.</b>	What exam question/s could be asked about this topic? Design your own questions using the concepts from each week
Week 6				
Week 7				

Lecture Topic	What did you learn from the readings, course materials, videos, worksheets? Concepts, new vocabulary	What did you learn at the lecture/lectorial/tutorial? Concepts, theories, differences, similarities	What did you learn in the lab/practical session? Application of concepts, practical skills <b>No practical in your course? Leave this blank.</b>	What exam question/s could be asked about this topic? Design your own questions using the concepts from each week
Week 8				
Week 9				

Lecture Topic	What did you learn from the readings, course materials, videos, worksheets? Concepts, new vocabulary	What did you learn at the lecture/lectorial/tutorial? Concepts, theories, differences, similarities	What did you learn in the lab/practical session? Application of concepts, practical skills <b>No practical in your course? Leave this blank.</b>	What exam question/s could be asked about this topic? Design your own questions using the concepts from each week
Week 10				
Week 11				

Lecture Topic	What did you learn from the readings, course materials, videos, worksheets? Concepts, new vocabulary	What did you learn at the lecture/lectorial/tutorial? Concepts, theories, differences, similarities	What did you learn in the lab/practical session? Application of concepts, practical skills <b>No practical in your course? Leave this blank.</b>	What exam question/s could be asked about this topic? Design your own questions using the concepts from each week
