HUNTER NEW ENGLAND CLINICAL TRIALS

Transforming Healthcare Through Integrated Clinical Research

A pioneering regional clinical trials delivery model that connects purpose-built facilities, coordinated trial management, and multiple healthcare sites to bring cutting-edge therapies to patients across the Hunter New England region.

PARTNERSHIP CAPABILITIES

- **Purpose-Built Infrastructure:** Dedicated clinical trials facility with expanded capabilities
- **Centralised Coordination:** Stream-lined trial development and operational oversight
- **Multi-Site Delivery:** Integrated network spanning tertiary and regional hospitals
- **Clinical Integration:** Embedded trial support and delivery within routine healthcare
- **Expert Teams:** Multidisciplinary professionals coordinating trial delivery

PROVEN IMPACT

- **Enhanced Patient Access:** Bringing innovative therapies to local communities
- **Regional Reach:** Expanding trials beyond metropolitan boundaries
- **Accelerated Timelines:** Faster trial activation and completion rates
- **System Efficiency:** Streamlined processes reducing duplication
- **Economic Growth:** Increased industry investment in regional healthcare

INNOVATIVE REGIONAL DELIVERY MODEL THE HNECT

Combines a state-of-the-art clinical trials facility at HMRI with an integrated Clinical Trials Support Unit and Coordinating Centre, creating a seamless pathway from trial conception to patient care. This unique “front door” approach enables trials to be efficiently developed and delivered across multiple sites, including John Hunter Hospital, Maitland, Belmont and beyond.
