

SMOKE FREE POLICY

The University of Newcastle is committed to ensuring, so far as reasonably practicable, that the University environment is without risks to the health and safety of any person at the University. This includes the risk posed by exposure to smoking products.

Providing a smoke free environment at all University campuses, building and vehicles will be achieved by:

- A no smoking policy on all UON campuses
- Supporting smoking cessation courses for staff and students by providing information on options available; and
- Taking action to resolve any breaches of the Policy.

Vice-Chancellor and President
