

NSW DECARBONISATION INNOVATION HUB

Accelerating Net Zero Solutions Through Collaborative Innovation

A unique initiative positioned at the intersection of academia, government and industry, driving the development and adoption of decarbonisation solutions. The Hub enables real-world impact through evidence-based innovation, workforce development and meaningful community engagement.

PARTNERSHIP CAPABILITIES

- **Innovation Support:** Accelerating technology development and commercialisation
- **Cross-Sector Collaboration:** Connecting academia, industry and government
- **Solution Implementation:** Supporting real-world deployment of technologies
- **Evidence-Based Guidance:** Informing policy and investment decisions
- **Workforce Development:** Building capability for the low-carbon economy

IMPACT

- **Emissions Reduction:** Delivering measurable climate action outcomes
- **Economic Growth:** Creating new investment and business opportunities
- **Energy Security:** Strengthening NSW's energy infrastructure
- **Regional Benefits:** Ensuring inclusive transition across communities
- **Industry Transformation:** Supporting key sectors including energy, transport and built environment

TRANSFORMING THE NET ZERO TRANSITION

The Hub brings together world-class research expertise, industry capability and policy engagement to de-risk emerging technologies and attract investment. This whole-of-ecosystem approach ensures the transition to net zero is not only achievable but delivers equitable, prosperous and regionally inclusive outcomes across NSW.
