

# Connecting your Linux (Ubuntu 12.04 Precise) device to the University wireless network

1. Click on the **Network Manager** icon in the Notification area on the top right of the screen.
2. Ensure “Enable Networking and “Enable Wireless” are ticked.
3. From the list of wireless networks, select “newcastle.edu.au”.
4. Fill in the fields on the Authentication window as follows.

Type **UNCLE\** before your Uni-ID

Students: use your Student-ID (eg. **UNCLE\c1234567**) and **myHub** password.

Staff: use your Uni-ID (eg. **UNCLE\abc123**) and **Internet** password.

5. Click “Connect”
6. On the NetworkManager Applet pop up:  
Tick “**Don't warn me again**” and  
Click “**Ignore**”
7. Your network manager icon should now show wireless signal strength.

8. You are now connected.
