### **ELEC3130: Electric Machines and Power Systems**

Callaghan Semester 1 - 2024

# **OVERVIEW**

| Course Description                | Analyses the steady state performance of D.C. and A.C. (single<br>and polyphase) machines in the context of their application.<br>Space vector theory is introduced. Fundamental power system<br>topics are introduced including transmission line parameters and<br>steady state operation and power system representation.    |
|-----------------------------------|---|
| Academic Progress<br>Requirements | Nil   |
| Assumed Knowledge                 | ELEC2132, ELEC2320 and ELEC2430 (previously ELEC2400)   |
| Contact Hours                     | Callaghan         Laboratory         Face to Face On Campus         6 hour(s) per term starting Week 1         Lecture         Face to Face On Campus         2 hour(s) per week(s) for 13 week(s) starting Week 1         Tutorial         Face to Face On Campus         1 hour(s) per week(s) for 12 week(s) starting Week 2 |
| Unit Weighting                    | 10  |
| Workload                          | Students are required to spend on average 120-140 hours of effort (contact and non-contact) including assessments per 10 unit course.   |

### CONTACTS

| Course Coordinator | <b>Callaghan</b><br>Dr Colin Coates<br>Colin.Coates@newcastle.edu.au<br>(02) 4921 8969<br>Consultation: Office: EAG23<br>Consultation Hours: Monday 2pm - 4pm, other times by appointme |  |  |  |  |
|--------------------|---|--|--|--|--|
| Teaching Staff     | Other teaching staff will be advised on the course Canvas site.   |  |  |  |  |
| School Office      | <b>School of Engineering</b><br>EAG02<br>EA Building<br>Callaghan<br>+61 2 4921 5798  |  |  |  |  |

# 9.00am-1.00pm and 2.00pm-5.00pm (Monday to Friday)

### **SYLLABUS**

| Course Content              | <ul> <li>The course content includes the following topics:</li> <li>DC machines</li> <li>AC machine windings</li> <li>Space vector theory</li> <li>Steady state analysis of AC machines (polyphase and single phase)</li> <li>Transmission lines</li> <li>Power system representation</li> <li>Power flow</li> </ul>   |
|-----------------------------|--|
| Course Learning<br>Outcomes | <ol> <li>On successful completion of this course, students will be able to:         <ol> <li>Solve electrical engineering problems associated with electric machines and power systems.</li> <li>Write technical reports associated with the laboratory exercises</li> <li>Perform experiments, collect data using appropriate measurement equipment and analyse these data so that reasonable conclusions can be made.</li> </ol> </li> <li>Perform as a member of a team in performing laboratory tasks in a setting which approximates an industrial environment.</li> <li>Perform work safely and be aware of the workplace health and safety implications of the tasks carried out.</li> </ol>  |
| Course Materials            | <ul> <li>Lecture Materials:</li> <li>The lecture materials, tutorial questions, laboratory notes and other resources are located in the Canvas course site</li> <li>Recommended Reading: <ul> <li>Stephen D Umans "Fitzgerald and Kingsley's Electric Machinery", McGraw Hill, 7th Ed</li> <li>D O'Kelly and S Simmons, "Introduction to Generalised Electrical Machine Theory", McGraw Hill Publishers</li> <li>MS Sarma, "Electric Machines, Steady State Theory and Dynamic Performance", PWS Publishing Company, 2nd Ed</li> <li>JD Glover, TJ Overbye, MS Sarma and AB Birchfield, "Power System Analysis and Design", Cengage, 7th Ed</li> <li>Stephen J Chapman, "Electric Machinery Fundamentals", McGraw Hill 5th Ed</li> </ul> </li> </ul> |

## ASSESSMENTS

This course has 3 assessments. Each assessment is described in more detail in the sections below.

|   | Assessment Name    | Due Date  | Involvement | Weighting | Learning<br>Outcomes |
|---|--------------------|---|-------------|-----------|----------------------|
| 1 | Quizzes            | There are three quizzes that will be<br>undertaken during the scheduled<br>lectures in weeks 4, 7 and 10.   | Individual  | 30%       | 1                    |
| 2 | Laboratories       | One laboratory report per group (per<br>laboratory exercise) is to be<br>submitted in the ELEC3130<br>assignment box in the foyer of<br>building EA by 5pm Friday 7th June,<br>2024 | Group       | 20%       | 2, 3, 4, 5           |
| 3 | Formal Examination | Exam will be scheduled during the formal exam period  | Individual  | 50%       | 1                    |

Late Submissions

The mark for an assessment item submitted after the designated time on the due date, without an approved extension of time, will be reduced by 10% of the possible maximum mark for that assessment item for each day or part day that the assessment item is late. Note: this applies equally to week and weekend days.

#### **Assessment 1 - Quizzes**

| Assessment Type             | Quiz   |
|-----------------------------|--|
| Purpose                     | The purpose of the quizzes is to provide students with feedback on their progress in the course. These tests may highlight areas of concern and stimulate discussion with the lecturer and tutors. |
| Description                 | The quiz papers will require written solutions to electric machines and power systems related problems.  |
| Weighting                   | 30%  |
| Length                      | 50 minutes per quiz  |
| Due Date                    | There are three quizzes that will be undertaken during the scheduled lectures in weeks 4, 7 and 10.  |
| Submission Method           | In Class   |
| Assessment Criteria         | The quizzes are assessed based on the correctness of solutions and the approach used to obtain them (working out)  |
| Return Method               | In Class   |
| Feedback Provided           | Returned Work - Worked solutions will be made available in Canvas with the opportunity to discuss these in tutorials   |
| Opportunity to<br>Reattempt | Students WILL NOT be given the opportunity to reattempt this assessment.   |

#### **Assessment 2 - Laboratories**

| Assessment Type             | Tutorial / Laboratory Exercises  |  |  |  |  |  |  |
|-----------------------------|--|--|--|--|--|--|--|
| Purpose                     | The laboratories are small group based practical exercises. the purpose of the labs is to give students hands on familiarity with standard electric machines. Students are required to measure and collect data along with the organisation, analysis and presentation of results in a technical report. |  |  |  |  |  |  |
| Description                 | Each group is to complete three laboratory exercises.  |  |  |  |  |  |  |
| Weighting                   | 20%  |  |  |  |  |  |  |
| Length                      | 2 hours per lab exercise   |  |  |  |  |  |  |
| Due Date                    | One laboratory report per group (per laboratory exercise) is to be submitted in the ELEC3 assignment box in the foyer of building EA by 5pm Friday 7th June, 2024  |  |  |  |  |  |  |
| Submission Method           | Assignment Boxes   |  |  |  |  |  |  |
| Assessment Criteria         | ria Laboratories are assessed on the accuracy of measured results and the level<br>understanding of the relevant theory that explains the results as demonstrated in t<br>submitted laboratory report.   |  |  |  |  |  |  |
| Return Method               | Not Returned   |  |  |  |  |  |  |
| Feedback Provided           | In Person - Feedback on laboratory reports is provided on request  |  |  |  |  |  |  |
| Opportunity to<br>Reattempt | Students WILL NOT be given the opportunity to reattempt this assessment.   |  |  |  |  |  |  |

### **Assessment 3 - Formal Examination**

| Assessment Type             | Formal Examination  |  |  |  |
|-----------------------------|---|--|--|--|
| Purpose                     | The final exam is designed to test individual student knowledge and understanding of the course material and their ability to describe, analyse and hypothesise from this material. |  |  |  |
| Description                 |   |  |  |  |
| Weighting                   | 50%   |  |  |  |
| Length                      | 2 hour  |  |  |  |
| Due Date                    | Exam will be scheduled during the formal exam period  |  |  |  |
| Submission Method           | Formal Exam   |  |  |  |
| Assessment Criteria         | The final exam is marked on the correctness of the solution and the method (working out) demonstrated in obtaining the solution.  |  |  |  |
| Return Method               | Not Returned  |  |  |  |
| Feedback Provided           | In Person - Feedback on the final exam is provided on request   |  |  |  |
| Opportunity to<br>Reattempt | Students WILL NOT be given the opportunity to reattempt this assessment.  |  |  |  |

## **ADDITIONAL INFORMATION**

| Grading Scheme           | This course is graded as follows:                    |  |  |  |  |  |
|--------------------------|--|--|--|--|--|--|
|                          | Range of<br>Marks                                    | Grade  | Description  |  |  |  |
|                          | 85-100   | High<br>Distinction<br>(HD)  | Outstanding standard indicating comprehensive knowledge<br>and understanding of the relevant materials; demonstration of<br>an outstanding level of academic achievement; mastery of<br>skills*; and achievement of all assessment objectives.                         |  |  |  |
|                          | 75-84  | Distinction<br>(D)   | Excellent standard indicating a very high level of knowledge<br>and understanding of the relevant materials; demonstration of<br>a very high level of academic ability; sound development of<br>skills*; and achievement of all assessment objectives.                 |  |  |  |
|                          | 65-74  | Credit<br>(C)  | Good standard indicating a high level of knowledge and<br>understanding of the relevant materials; demonstration of a<br>high level of academic achievement; reasonable development<br>of skills*; and achievement of all learning outcomes.                           |  |  |  |
|                          | 50-64  | Pass<br>(P)  | Satisfactory standard indicating an adequate knowledge and<br>understanding of the relevant materials; demonstration of an<br>adequate level of academic achievement; satisfactory<br>development of skills*; and achievement of all learning<br>outcomes.             |  |  |  |
|                          | 0-49   | Fail<br>(FF)   | Failure to satisfactorily achieve learning outcomes. If all compulsory course components are not completed the mark will be zero. A fail grade may also be awarded following disciplinary action.  |  |  |  |
|                          | *Skills are th                                       | ose identified   | for the purposes of assessment task(s).  |  |  |  |
| Communication<br>Methods | Communicat<br>- Canva<br>or anr<br>- Email<br>- Face | ion methods u<br>as Course Site<br>nouncements<br>: Students will<br>to Face: Comm | used in this course include:<br>e: Students will receive communications via the posting of content<br>on the Canvas course site.<br>I receive communications via their student email account.<br>munication will be provided via face to face meetings or supervision. |  |  |  |

**Course Evaluation** Each year feedback is sought from students and other stakeholders about the courses offered in the University for the purposes of identifying areas of excellence and potential improvement.

- Oral Interviews (Vivas) As part of the evaluation process of any assessment item in this course an oral examination (viva) may be conducted. The purpose of the oral examination is to verify the authorship of the material submitted in response to the assessment task. The oral examination will be conducted in accordance with the principles set out in the <u>Oral Examination (viva) Procedure</u>. In cases where the oral examination reveals the assessment item may not be the student's own work the case will be dealt with under the <u>Student Conduct Rule</u>.
- Academic Misconduct All students are required to meet the academic integrity standards of the University. These standards reinforce the importance of integrity and honesty in an academic environment. Academic Integrity policies apply to all students of the University in all modes of study and in all locations. For the Student Academic Integrity Policy, refer to <a href="https://policies.newcastle.edu.au/document/view-current.php?id=35">https://policies.newcastle.edu.au/document/view-current.php?id=35</a>.

| Adverse<br>Circumstances        | <ul> <li>The University acknowledges the right of students to seek consideration for the impact of allowable adverse circumstances that may affect their performance in assessment item(s). Applications for special consideration due to adverse circumstances will be made using the online Adverse Circumstances system where: <ol> <li>the assessment item is a major assessment item; or</li> <li>the assessment item is a minor assessment item and the Course Co-ordinator has specified in the Course Outline that students may apply the online Adverse Circumstances system;</li> <li>you are requesting a change of placement; or</li> <li>the course has a compulsory attendance requirement.</li> </ol> </li> <li>Before applying you must refer to the Adverse Circumstance Affecting Assessment Items Procedure available at: <a href="https://policies.newcastle.edu.au/document/view-current.php?id=236">https://policies.newcastle.edu.au/document/view-current.php?id=236</a></li> </ul> |  |
|---------------------------------|---|--|
| Important Policy<br>Information | The Help button in the Canvas Navigation menu contains helpful information for using the Learning Management System. Students should familiarise themselves with the policies are procedures at <a href="https://www.newcastle.edu.au/current-students/respect-at-uni/policies-ang-procedures">https://www.newcastle.edu.au/current-students/respect-at-uni/policies-ang-procedures</a> that support a safe and respectful environment at the University.   |  |

This course outline was approved by the Head of School on 30.01.2024. No alteration of this course outline is permitted without Head of School approval. If a change is approved, students will be notified and an amended course outline will be provided in the same manner as the original.

#### Graduate Profile Statements - ELEC3130 - S1 2024

This course builds students' capacity in the following University of Newcastle Bachelor of Engineering Graduate Profile Statements (based on 2011 Engineers Australia revised Stage 1 Competency Standards for Professional Engineers):

| UON<br>Att. | University of Newcastle Bachelor of Engineering Graduate Profile Statements/<br>Engineers Australia Stage 1 competency statements   | Taught | Practised | Assessed | Skill Level<br>(1-4) |
|-------------|---|--------|-----------|----------|----------------------|
|             | Professional Attributes   |        |           |          |                      |
| 11          | 3.1. Ethical conduct and professional accountability  |        |           |          |                      |
| 12          | 3.2. Effective oral and written communication in professional and lay domains.  |        | Ø         | Q        | 3                    |
| 13          | 3.3. Creative, innovative and pro-active demeanour.   |        |           |          |                      |
| 14          | 3.4. Professional use and management of information.  |        |           | Ø        | 3                    |
| 15          | 3.5. Orderly management of self, and professional conduct.  |        | Ø         | Q        | 3                    |
| 16          | 3.6. Effective team membership and team leadership.   |        |           | Ø        | 3                    |
|             | Engineering Ability   |        |           |          |                      |
| 7           | 2.1. Application of established engineering methods to complex engineering problem solving.   | V      | Ø         | Ø        | 3                    |
| 8           | 2.2. Fluent application of engineering techniques, tools and resources.   |        |           |          |                      |
| 9           | 2.3. Application of systematic engineering synthesis and design processes.  |        |           |          |                      |
| 10          | 2.4. Application of systematic approaches to the conduct and management of engineering projects.  |        |           |          |                      |
|             | Knowledge Base  |        |           |          |                      |
| 1           | 1.1. Comprehensive, theory based understanding of the underpinning natural and<br>physical sciences and the engineering fundamentals applicable to the<br>engineering discipline. | Ŋ      | Ø         | V        | 3                    |
| 2           | 1.2. Conceptual understanding of the, mathematics, numerical analysis, statistics,<br>and computer and information sciences which underpin the engineering<br>discipline.         | Ŋ      | Ø         | V        | 3                    |
| 3           | 1.3. In-depth understanding of specialist bodies of knowledge within the engineering discipline.  | V      | Ø         | Ø        | 3                    |
| 4           | 1.4. Discernment of knowledge development and research directions within the engineering discipline.  |        |           |          |                      |
| 5           | 1.5. Knowledge of contextual factors impacting the engineering discipline.  |        |           |          |                      |
| 6           | 1.6. Understanding of the scope, principles, norms, accountabilities and bounds of contemporary engineering practice in the specific discipline.                                  |        |           |          |                      |
