

MISSION: To develop a unique business school identity which is distinctive in the marketplace and provides a clear value proposition for students. This will be achieved by embedding the themes of entrepreneurship and innovation, digitalisation and data within our programs and embracing sustainability, work integrated learning and a commitment to social justice.

OVERVIEW

Course Description

In contrast with growing their domestic market, businesses often engage in strategic market expansion to other countries, involving alternative processes that range from exporting to internationalisation, multinationalisation and globalisation. Each of these expansion strategies is unlike the others in the capabilities and competencies needed by the business, as well as in the core marketing considerations of segmentation, targeting and positioning it involves. Guided by the global marketing imperative, the course is designed to provide students with a thorough grounding in all facets of global marketing strategy. A framework is developed that focuses on such key issues as the global market environment, the global marketing mix, and the strategic consideration of global market segmentation, targeting and positioning decisions. The overall focus is on the identification of global marketing opportunities, and on the subsequent planning and development of global marketing strategies aligned to the identified opportunities. Case studies dealing with global marketing issues assist in the application of learning to practical situations and in the development of a global marketing plan for a product or product line.
